

RESIDENTIAL GRADE COATED PAPER SPECIFICATIONS

PRODUCT NAME:	RESIDENTIAL CLAY COATED WALLCOVERING
PRODUCT DIMENSIONS:	Single Roll - 27" W x 15' L Double Roll - 27" W x 30' L Untrimmed width 30" wide.
MATERIAL:	Sustainably harvested pulp paper with a natural clay coating
INK:	Water based inks
CLASS A:	Thatcher wallpapers are considered Class "A" in the interior wall & ceiling finish category according to the National Fire Protection Association Life Safety Code 101 when tested in accordance with NFPA 255/ASTM-E-84.
CARE AND CLEANING:	Wipe with a moist cloth or sponge. Do not oversoak the wallcovering surface. See Caution section for metallic printed wallcoverings.

CAUTION

Metallic printed wallcoverings require additional care at installation and should only be cleaned with mild soap and water. Stronger, more alkaline household cleaners (ex: Lysol) have the potential to damage the surface of the wallcovering along with excessive scrubbing.

MATERIAL INSPECTION

We inspect every roll and every order of Thatcher wallpaper before shipping. However, BEFORE OPENING wallcovering, the buyer/installer should carefully examine this wallpaper for color, design, quantity, dye lot and imperfections or visible damage before installing. Ensure also that there are enough rolls to complete the job. BEFORE CUTTING wallcovering, examine the wallcovering for any defects that may affect the quality of the installation. If there is any discrepancies or defects, contact Thatcher immediately. Defective wallcovering will be replaced. No labor costs will be reimbursed.

ENVIRONMENTAL

CLIMATE NEUTRAL CERTIFIED PRODUCT
NO PVC, LOW VOC

Our papers are manufactured in the USA with responsibly-sourced fiber (all USA sourced fiber), and all suppliers adhere to one of the globally recognized forestry or chain of custody programs. These include:

- Forestry Stewardship Council (FSC)
- Sustainable Forestry Initiative (SFI)
- Programme for the Endorsement of Forestry Certification (PEFC)
- Canadian Standards Association

Our papers are made with elemental chlorine-free fiber.

Our paper supplier is both an ISO 9001:2000 and ISO 14001:2004 certified company, and creates approximately 50% of its electricity by low-impact hydroelectric generators. 100% of the mill's short paper fiber is reclaimed and used in the agricultural industry for nutrient rich compost or animal bedding. Our paper supplier has been designated by the EPA as a national performance track company.
