Signs must be cleaned or replaced.
Liquid Hammer

- Liquid Hammer is the safest and most aggressive remover on the market. Liquid Hammer removes cement and concrete without damaging painted surfaces, aluminum, chrome, rubber, or composite materials. Its non-corrosive formula means that even sensitive engine components, including radiators, can be cleaned without fear of damage. Liquid Hammer is safe on virtually everything. Use it to remove cement, concrete, lime scale, and all other mineral deposits.

- One application of the product will remove light build-up. Moderate to severe build-up may require regular applications over a period of days or weeks. Dilutions will vary depending on preference with the frequency of use; normal dilution rate of 1:1 for moderate to heavy build-up and as low as 5:1 for light build-up including windshields and other glass products.
