

Important Care and Usage for your Gloves

- Caution the Cosmo Glove is not 100% Cut Proof. It is Cut resistant. (see below)
- Heat resistant glove up to 250 degrees Fahrenheit and will cause damage to the glove above that temperature.

GLOVE MATERIALS & CLEANING

Made with a engineered composite yarn, featuring HMWPE --the same material used in body and vehicle armor by the armed forces and law enforcement. The material is combined with silicon fiber and synthetic fibers to enhance the cut resistance and comfort, and treated with AlphaSan antimicrobial to protect the glove from the growth of bacteria and fungus. The glove is latex free. The glove is fully launder-able and may be bleached or soaked in any sanitizing solution.

SUGGESTED USE

WARNING! The Cosmo glove is NOT 100% cut or puncture proof and is designed to be worn on the hand to protect the outer layer of skin under normal use of sheers or scissors where slashing or a slice cut may occur. **Do not purposely and intently cut by stretching and cross deep crevice cutting of shears. Do not purposely force the cut OR LAY THEM FLAT AND TRY TO CUT.**

Do not use on temperatures higher than 250 Degrees Fahrenheit.
