## Measure a current ring

1. Select a ring that properly fits the intended finger.
2. Place the ring over the nearest matching circles below. Match the inside edge of the ring to the circle nearest in size.
3. If the ring size falls between two circles, order the larger size.
4. Double check sizing for accuracy.

## Measure your finger with string

1. Wrap the string around the base of your finger. You want the string to feel snug, but not tight.
2. Cut the string where it meets, ensuring no gap is left.
3. Measure the string against a ruler to see how many mm it is. Use the circumference column in the chart on page 1 or the diagram below to find your ring size.
