

BRAINWAVZ[®]

EARPAD ADAPTER RING FOR ARCTIS NOVA PRO WIRELESS INSTALLATION GUIDE

Remove Stock Pads

1

Wrap your fingers firmly around the pad, try go under the pad to get a stronger grip

2

Pull the earpads in a forward and sideways motion

You may hear multiple "clicks" as the pad releases from the internal tab system.

NOTE

The stock pad and plastic mounting ring are one piece

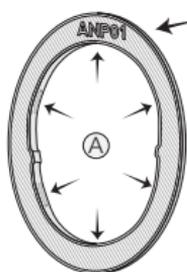

NOTE

Hold the headphones steady during the removal procedure.

Get To Know The Adapter Ring

FRONT

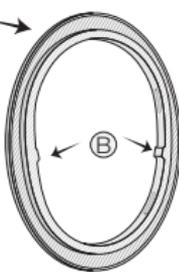

There are 6 mounting holes (A) on the inner edge of the adapter, these match the clips on the head unit.

TOP

BACK

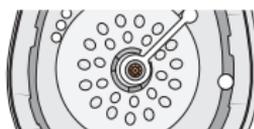

There are also two key guides (B) to help position the adapter correctly when installing.

Install The Adapter

NOTE: To make installation easier we recommend rotating the headset, so the TOP is facing towards you.

- 1 Place the TOP (A) of the adapter into its corresponding clip first, making sure the the key guides are lined up with the guides on the head unit (B).

- 2 With the adapter in its initial starting position push firmly on position (C) first, then a final push on position (D). You will here several clicks as the adapter fits into place.
- 3 Once the adapter is fitted you can now install the earpad of your choice from our Oval, Angled, ProStock and SteelSeries collections.
