BioDoph-7 Plus®

BioDoph-7 Plus[®] supplies a unique blend of probiotics and prebiotics, along with additional support for a healthy GI tract.

For Healthcare Professionals Only

Probiotics are classically defined as "a preparation of, or a product containing viable, defined microorganisms in sufficient numbers, which alter the microbiota (typically by colonization) in a compartment of the host, and by that, exert beneficial health effects in this host". In humans the organ considered to be the most diverse and the most metabolically active is the gastrointestinal tract. An integral part of an optimally functioning gastrointestinal tract is the microbial community.

Formulated in collaboration with Dr. Gary Lasneski, **BioDoph-7 Plus®** contains a specific blend of 3 prebiotics and 7 probiotics to ensure optimal colonization with bacterial strains recognized for their bioactivity.

Recommended dosage is one (1) capsule, taken one to two (1-2) times per day as a dietary supplement or as otherwise directed by a healthcare professional.

*Note: Refrigerate after opening.

- Multiple Improves digestive function
- Multiple Status
- Increases beneficial anaerobes
- Decreases "unfriendly" organisms
- Stimulates phagocytosis
- Soothes gastric mucosa
