

Caprin®

For Healthcare Professionals Only

Caprin®: Provides a source of Caprylic acid (as calcium & magnesium caprylate), a medium-chain fatty acid.

Caprin® provides nutritional support to help balance the intestinal flora by assisting in the maintenance of internal candida stasis. Candida albicans is a yeast, belonging to the mold and fungi family, having the potential to negatively impact health. Candidiasis is a condition occurs when Candida (yeast) infects the skin and mucous membranes of the body. Typically, candidiasis occurs in the colon, vagina, mouth, throat, lungs or nails. Symptoms of intestinal candidiasis can be present as headaches, confusion, and loss of energy, to chronic fatigue, cramps, bloating, rectal itching and gas.¹

Recommended dosage is one to three (1-3) capsules each day with food as a dietary supplement or as otherwise directed by a healthcare professional.

Note: use with FC-Cidal™ and A.D.P.® in difficult chronic fungal/yeast overgrowth.
