

NutriClear[®], NutriClear[®] Chocolate & NutriClear[®] Free

Nutritional Support for Detoxification & Metabolic Clearing

NutriClear[®], NutriClear[®] Chocolate and NutriClear[®] Free

are unique products that supply key nutrients for hepatic function, energy production and intestinal balance.

To place your order for **NutriClear[®]**, **NutriClear[®] Chocolate** or **NutriClear[®] Free** or for additional information please contact us:

(800) 636-6913

NutriClear[®] is a chemically defined food designed to support the nutritional needs of a wide spectrum of patients. **NutriClear[®]** is especially useful for those in need of metabolic clearing and those who are sensitive to certain foods or chemicals.

NutriClear[®] is available in three choices: **NutriClear[®]** with natural vanilla flavor, **NutriClear[®] Chocolate** with natural chocolate flavor and **NutriClear[®] Free** containing no sweeteners.

NutriClear[®] is a unique product that supplies key nutrients for hepatic function, energy production and intestinal balance. The formula includes easily digested protein, medium chain triglycerides and an extensive complement of antioxidants. **NutriClear[®]** is also compatible with vegetarian diets.

- Helps support the body's enzymatic processing and elimination of potentially harmful substances.
- Compensates for nutrient deficits, resulting from maldigestion and malabsorption.
- Protects against oxidative stressors associated with detoxification.
- Helps sustain tissue rebuilding.

NutriClear[®] is particularly useful as an ideal dietary foundation for comprehensive metabolic clearing and detoxification programs to help you address the complete needs of toxin-burdened patients.

Nutritional Support for Detoxification & Metabolic Clearing

How should this product be used?

Depending upon the patient's condition and rate of detoxification, a metabolic cleansing program may last several weeks. The use of **NutriClear[®]** simplifies the process of defining a simplified, balanced diet with low allergenicity during the "wash out" phase. Using **NutriClear[®]** as a meal replacement for the first three days (five times daily) may be optimal; after which, **NutriClear[®]** can be used to replace two meals daily. Five servings of **NutriClear[®]** provide 800 calories.

Continuing with meals based on foods with minimal allergenicity can stabilize the body's normal processes for the removal of toxic materials. The diet should include ample soluble and insoluble fiber from whole or minimally processed foods and an adequate amount of pure water in order to optimize gut function.

Which is better, mixing NutriClear[®] with water or with juice?

NutriClear[®] can be mixed either in pure water or in almond or rice milk, depending upon the individual's program objectives. Vegetable or fruit juices can provide additional flavor; however, we recommend using certified organic fruits and vegetables for juicing, and diluting fruit juices with water to decrease their carbohydrate concentration.

Does weight loss accompany a metabolic cleansing program?

In the usual scenario, fluid retention accompanies toxin buildup and as toxins are released and removed, retained fluids are lost. While designed to be part of a metabolic cleansing program, **NutriClear[®]** may be useful as part of a comprehensive weight management program.

Is a detox program appropriate for diabetic or hypoglycemic patients?

NutriClear[®] provides a low level of carbohydrates. The fat and protein content can be expected to slow stomach emptying and slow carbohydrate uptake by the intestine, thus having a minimal impact on blood sugar fluctuations. Patients with blood sugar dysregulation should monitor their blood glucose.

NutriClear[®] is available with natural vanilla (#6400), chocolate flavor (#6402) and free of all sweeteners (#6406)
