The Externship Dental Assistant Requirements

The Complete Externship Program (CEP) and the Surgical Externship Program (SEP) at the Midwest Implant Institute® embodies the complete surgical curriculum. Affiliation of either program allows the doctor and assistant to complete as many surgical procedures as the extern doctor would prefer in their live training until their graduation date.

Packed with everything ranging from surgical preparation and infection control, to in-depth biologics, the Externship Assistant Track offers the knowledge and confidence to provide doctors and patients with the ultimate implant experience.

The Midwest Implant Institute graduation requirements include:

- [ ] Explain to patient functionality of implant, abutment, and crown, and the entire implant process

- [ ] Treatment plan basic implant procedures from start to finish

- [ ] Successfully review medical history for each surgery patient and analyze what that means for surgery

- [ ] Master 6 handed dentistry

- [ ] Identify instruments used in surgical procedures

- [ ] Properly set up a half drape surgery (Solo)

- [ ] Review post-op instructions with surgery patients (Solo)

- [ ] Execute pre and post surgical surgery documents

- [ ] Complete and document surgical notes in software (Solo)

- [ ] Adapt any prosthetics work post operatively

- [ ] Surgical photography to document all Extern surgeries
