## Eco Moth Trap

IZMOTZZZZ

## Assembly instructions

Thank you for purchasing this Skinner-type moth trap from the Nestbox Company.

The trap has been designed to slot together so it's easy and fast to put up without tools, and it can be quickly taken apart for transport or storage.

**The following parts make up your moth trap:**

Right Side

Left Side

Back

Base

Front

Light Board

Clear Plastic x 2

Security Clip

### Stage 1.

Take the **Left Side** and **Right Side** panels and attach them (with the T shape piece facing inwards) to the **Back** panel. To do this, push the hooks on the side panels through the slots on the back panel then slide the side panels upwards.

### Stage 2.

Slide the **Base** panel into the hooks at the bottom of the side panels. Push it back so the tab on the base panel fits into the slot at the bottom of the back panel.

**Stage 3.**

Take the **Front** panel and slide the hooks on the Side panels through the Front panel. Then slide the front panel down so the tab at the bottom of the front panel slots into the base panel.

**Stage 4.**

To lock all the panels in place, insert the pin of the **Security Clip** through the hole in the tab on the front panel and then flip the ring over the tab to secure the Clip in place

**Stage 5.**

Take the **Clear Plastic** panels and slide them diagonally into the box so they rest on the inner corners of the T piece on each side panel

**Stage 6.**

The final stage is to fit the Light Board (with your light attached). This fits between the slots

just below the handles on the Side panels. To fit push the end into the slot on the left hand side then drop the other end down below the handle on the right side.

You are now ready to start operating your moth trap, put some egg boxes in the trap to ensure the moths have somewhere to hide once they've entered the trap.

If you have purchased the optional rain guard or actinic light set please refer to the user guides that are supplied with these which provide details of how to fit these to your moth trap.
