Denmark

Letter of Recommendation

We have been using EcoBETA products for the last 4 years in our council area. We have had absolutely no problems with the water savers that have been installed in our cisterns, the toilets have functioned as they should, and Lyngby-Taarbæk Municipality has reaped the benefits of up to 25% water savings on an annual basis.

As the energy engineer for Lyngby-Taarbæk Municipality, I can highly recommend EcoBETA.
