

No Special Care Needed

For Your St. Augustine, Florida Marble Lion Replicas

These are care instructions by the Old World makers
of the little lion replicas:

No special care is needed, you can dust or clean as any other ornamental household object, they are very robust.

If they get very dirty, you can wash in warm soapy water.

[Note by Gail of St. Augustine Loves Lions. I've had my lions for nearly three years and have never had to wash them. I just lightly dust them when I happen to be dusting everything else.]

If you get a bad mark that will not remove with soapy water you can use a very fine abrasive paper to wipe it gently away.

If you polish them, they'll gradually generate their own patina with a slight sheen. Please don't use any polish or anything on the cloth. All that's needed is a soft, dry cloth. The harder or more often you polish them, the more they will sheen, just as natural marble does.
