

## RÉSINE INFORMATION

The BRADLEY Résine™ finish is a proprietary multi-step solvent-based coating suitable for wood and metal surfaces. Résine was originally developed and perfected in our product development labs as a solution to a major void in the luxury furniture industry: a durable, ultrahigh gloss furniture finish that is as functional as it is beautiful. When applied in successive layers and polished, the finish appears to have permanent “wet look” only found on luxury automobiles. This robust coating can be used on vertical and horizontal surfaces for most of our metal and wood furnishings. Included in the diverse palette of Résine colors, are classic neutral tones, vibrant hues, as well as soft pearlescent effect metallics.

### CHARACTERISTICS OF RESINE

- BRADLEY Résine is available on a limited selection of wood and metal furnishing products. Contact your representative for more information.
- Résine is only available in a high gloss finish.
- In addition to the standard BRADLEY Résine color palette, custom color matching is available for an upcharge.
- Résine finishes that become damaged with light surface abrasions or scratches, may be repaired by a professional furniture refinisher on site. Deep scratches, chips or gouges may need to be repaired at a professional refinishing shop or returned to our workshop for repair or refinishing.
- No BRADLEY finishes are warranted against fading, peeling, abrasion, or rust/corrosion under any circumstance if used outdoors, exposed to extreme conditions or subjected to other misuse/neglect.
- See the BRADLEY Care and Maintenance Guide for information on the care of our Résine finishes.

### CUSTOM COLOR MATCHING

- Custom color matching is available for the BRADLEY Résine product line for an upcharge.
- Due to the complexity of custom color matching these coatings, an exact match to a customer provided color swatches is not guaranteed, but typically color matches will be within a 5% tolerance range of measured CMYK values, according to automotive industry finish standards.
- In the event the custom color match does not meet the customer’s approval, the color matching fee is not refundable. The customer will have the option to choose a different color from the BRADLEY standard Résine palette, or initiate another custom color match attempt for an additional fee.
- Refer to the BRADLEY Custom Color Match Policy for more details about our custom color match process.
- To order a custom color match for Résine, contact your BRADLEY representative for more information.
