

Rain Bird LX-IVM Compatible Pump Start Relay

The Rain Bird line of pump start relays work with a lawn controller's start/stop command to facilitate the electrical path from the breaker box to the pump motor.

Rain Bird PSR110/220-IVM models are specifically designed to work with the Rain Bird LX-IVM Controller through the use of a 9 volt latching relay. This provides "pilot duty" operation for all types of electrically driven pump equipment.

* National electrical code (nec) states all motors will be thermally protected from excessive "amperage draw." Most motors under 2 hp are supplied with thermal protection from the motor manufacturer. For motors over 2 hp, code-compliant Rain Bird PSRB pump protection is recommended.

NOTE: Circuit breakers are never classified as motor protection.

NOTE: Check with your local health department for regulations and requirements for backflow protection.
