DESCRIPTION

This product is a true breakthrough cleaner. With a pH of less than 1, this concrete rust remover has the performance of an acid, yet it is safer and mild to skin like a liquid dish soap.

Removes rust stains from concrete to restore the surface to like-new. The thickened formulation enhances dwell time and performance, and works on new and old, light and heavy, stains. Also effective on rust stains on other surfaces, including metal, porcelain, fiberglass, and brick. Nonflammable and biodegradable. Ships DOT non hazardous.

DIRECTIONS

Dilute up to 1:1 for light rust stains, or use undiluted for heavy stains.

Apply directly to stained surface. Allow dwell time for most stains. Agitation may be required for heavy stains. No need to rinse concrete surface after treatment. Rinse any metal surfaces that may have been treated. Treat original source of rusting with a rust converter to prevent future staining.

Etching may occur on some surfaces. Always test in an inconspicuous area before use. Not for use on marble.

DISPOSAL: Dispose of contents/container to comply with local/regional/national/international regulations
