DIRECTIONS

Wiping down electronic equipment with these wipes protects devices from static electricity and prevents dust accumulation.

Pre-moistened with a special formula that neutralizes the effects of static electricity, these wipes prevent the loss of important data stored on computer equipment such as hard drives.

In addition, by eliminating static, less dust collects on surfaces to keep equipment, like LCD screens, cleaner for longer.

DIRECTIONS

Power down electronic equipment. Wipe surface and discard after use.

DIRECTIONS FOR DISPENSING
