Manufactured By: Total Solutions® • 1-800-743-6417
PO Box 240014 • Milwaukee, WI 53224 • athea.com

DESCRIPTION

These wipes combine powerful cleaning agents with waste-digesting bacterial-enzymes to produce a product that literally wipes away heavy soils and stains from carpet and upholstery.

Within seconds after a wipe is applied to a stain, the cleaning agents and surfactants are already working to separate the soil from the fabric fibers. Once the stain is separated from the fibers, the bacteria go to work to digest any organic matter that may be present, as well as any odors that may accompany the stain.

These wipes remove some of the toughest stains, including: wine, coffee, juice, oil, ketchup, blood, ink, pet accidents, vomit and more.

DIRECTIONS

Spot Removing: Blot stained spot with a wipe until the stain begins to disappear. Set-in stains may require additional blotting or rubbing.

Odor Elimination: Once stain is removed, place a fresh wipe over the affected area and moisten with water. Leave for 24 hours so the natural bacteria in the wipe can destroy the odor and eliminate unseen organic matter.

DIRECTIONS FOR DISPENSING

1. Remove lid by lifting upward. Remove foil seal.
2. Pull towel from center of the roll and thread through "X" on the underside of the lid.
3. Close lid. Pull towel at 90° angle.
4. Snap hinged cap back into place to ensure towels stay moist.

DISPOSAL

Offer empty container for recycling. If recycling is not available, discard container in trash. Do not flush wipes.

*For industrial and commercial use only.
For additional information,
see Safety Data Sheet.*

Canister made from 25% post-consumer recycled plastic.

Please Recycle.
