

DESCRIPTION

A unique blend of bacteria specifically designed to degrade a variety of petroleum products including fuel oils, crude oil, coal tar, gasoline and diesel oil. Designed specifically for petroleum-contaminated wastewater, car and truck washes, marine bilges or oil reclamation pits. Degrades the oil; reducing odors and reducing sludge volume.

For Car and Truck Washes: It is recommended to clean the recycled water tank in order to remove as much biofilm as possible and start with fresh water. Follow directions for recommended dosage. Regular use of Bio-Blast HCB will keep the entire wash facility smelling fresh and will extend the life of the car wash brushes.

DISPOSAL

Offer empty container for recycling. If recycling is not available, discard container in trash.

TOTAL SOLUTIONS®

BACTERIAL/ENZYME DIGESTANTS

BIO-BLAST HCB

Reduces Odors

- REDUCES GREY WATER PIT PUMP OUTS
- EXTENDS THE LIFE OF CAR WASH BRUSHES

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: One Gallon (128 fl. oz.)

Manufactured By: Total Solutions®
PO Box 240014 • Milwaukee, WI 53224 • 1-800-743-6417

DIRECTIONS

Using a single dose or automatic continuous feed system, feed 18-20 ounces per day into a 500-1,500 gallon tank (65-200 cubic feet). For 1,500 gallon tank (200+ cubic feet) or larger, feed at a rate of 32-40 ounces per day. For best results, dose tank at the end of the day or during low use periods. This allows optional growth time for the bacteria. Regular usage allows the beneficial bacteria to become established in the tank keeping odors to a minimum. Do not use any disinfectants or bleach in the tank.

NFPA® RATINGS

Health: 0; Flammability: 0; Reactivity: 0

CONTAINS/CAS NUMBER:

Water/7732-18-5; Viable Bacterial Cultures/Proprietary; Styrene/Acrylic Copolymer/9010-92-8; Fragrance/Mixture; Tetrasodium Ethylenediamine Tetraacetate/64-02-8
