## Nude Nicotine – GC/MS Analysis Results

<b>Customer Name:</b>	<b>Date of Sample Receipt:</b>	<b>External Lot Number:</b>
You Got eJuice	February 9 <sup>th</sup> , 2016	N/A
<b>Product Name:</b>	<b>Date of Analysis:</b>	<b>NN Analytics Sample ID:</b>
Strawberry Custard	February 9 <sup>th</sup> , 2016	YG10

Scope of Method  
to be Performed:

### Diketone Trio Analysis:

Aliquot is diluted 10:1 with methanol containing a known amount of butyric-d7 acid as an internal standard. The aliquot is then capped, mixed, and injected into the GC/MS system. Analyte identification is confirmed by no less than 3 unique ion fragments by the mass selective detector. Results are quantitated utilizing a calibration curve generated from certified reference materials.

Analytical Compound	Description	CAS #	Limit of Detection (LOD)	Results
2,3-Butanedione (diacetyl)	Diketone	431-03-8	1.08ug/mL	<LOQ
2,3-pentanedione (acetyl propionyl)	Diketone	600-14-6	1.26ug/mL	194ug/mL ± 0.194ug/mL
3-Hydroxy-2-butanone (acetoin)	Ketone	513-86-0	1.01ug/mL	238ug/mL ± 0.238ug/mL

ND = Not Detected / 1ug/mL = 1ppm / 1000ug/mL = 1mg/mL

The above results are guaranteed accurate and precise to the best of our ability. Data has been checked and in accordance with Nude Nicotine's approved analytical protocols. I certify that all results in this report are adherent to this statement:

<b>GC/MS Operator and Analytical Report Prepared by:</b>	<b>Signature &amp; Date:</b>
J. Rubenstein	

**Notes:** Samples were received in good condition with factory seals intact. Chain of custody was properly maintained during the entirety of the sampling and receipt process.
