Gas Chromatography Tandem Mass Spectrometry (GC/MS) Analysis Results:

Customer Name:		Date of Sample Receipt:	Date of Analysis:
You Got eJuice		September 2 nd , 2016	September 7 th , 2016
Analytical Compound:	Description:	CAS #:	Limit of Detection:
2,3-Butanedione (diacetyl)	Diketone	431-03-8	1.08ug/mL
2,3-pentanedione (acetyl propionyl)	Diketone	600-14-6	1.26ug/mL
3-Hydroxy-2-butanone (acetoin)	Ketone	513-86-0	1.01ug/mL

Scope of Method
 to be Performed:

Diketone Trio Analysis:

Aliquot is diluted 10:1 with methanol containing a known amount of butyric-d7 acid as an internal standard. The aliquot is then capped, mixed, and injected into the GC/MS system. Analyte identification is confirmed by no less than 3 unique ion fragments by the mass selective detector. Results are quantitated utilizing a calibration curve generated from certified reference materials.

Product Name:	External Lot Number:	Results – Diacetyl:	Results – Acetyl Propionyl:	Results – Acetoin:
Tobacco Menthol	N/A	ND	ND	ND

<LOQ = Below limit of Quantitation / ND = Not Detected / 1ug/mL = 1ppm / 1000ug/mL = 1mg/mL

The above results are guaranteed accurate and precise to the best of our ability. Data has been checked and in accordance with Nude Nicotine’s approved analytical protocols. I certify that all results in this report are adherent to this statement:

GC/MS Operator and Analytical Report Prepared by:	Signature & Date:
J. Rubenstein	

Notes: Samples were received in good condition with factory seals intact. Chain of custody was properly maintained during the entirety of the sampling and receipt process. This document was drafted as a .pdf and contains two pages.
