

Buddy Club Sports Chip is in the leading industry of ECU tuning management and monitoring assessment. Release the power hidden within the ECU by replacing conservative factory settings with more aggressive calibrations. The result is with improved gains in horsepower and torque while maintaining a high degree of reliability.

Sports Chip

Performance Advance Module

取扱説明書 INSTALLATION MANUAL

Honda 1.5T L15B7

www.buddyclub.co.jp

- Buddy Club Sports Chip is intended for **off-road use only** while installation and use of the Sports Chip may void all or a portion of the vehicle manufacturer's standard warranty.
- There is no guarantee expressed or implied by Buddy Club or any of its affiliates for the use of the Sports Chip. The user accepts all risks and responsibilities when using the Sports Chip.
- Use of the Sports Chip while operating a moving vehicle is strictly prohibited by law. Buddy Club and its affiliates accept no responsibility for damages or injury caused by misuse of the Sports Chip.
- The Sports Chip may not be able to function if the vehicle's wiring has been modified. If problems occur while using the Sports Chip, please verify that all wiring to and from the ECU is correct and functional.
- For installation purposes, it is important to ensure that the vehicle's battery has adequate power for both the Sports Chip and the ECU. Because of this, it is recommended that all in-car electronics and vehicle lights are turned off during the installation process to reduce drain on the vehicle's battery.

Environmental Information

1. Never store your Sports Chip in an area that receives direct sunlight.
2. Take care to prevent any liquids from coming in contact with the Sports Chip or any associated equipment.
3. Never store your Sports Chip in an area that experiences any noticeable levels of vibration, static electricity, heat shock, or excessive swings in relative humidity.

Do Not Attempt Repairs Yourself

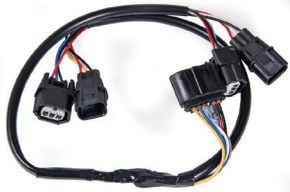

Never attempt to open your Sports Chip or any associated equipment. Doing so puts the components at risk of damages from, but not limited to, static shock. No user-serviceable parts are inside. At no time will ANY authorized representative of Buddy Club will ask you to open or mechanically/electronically alter the Sports Chip.

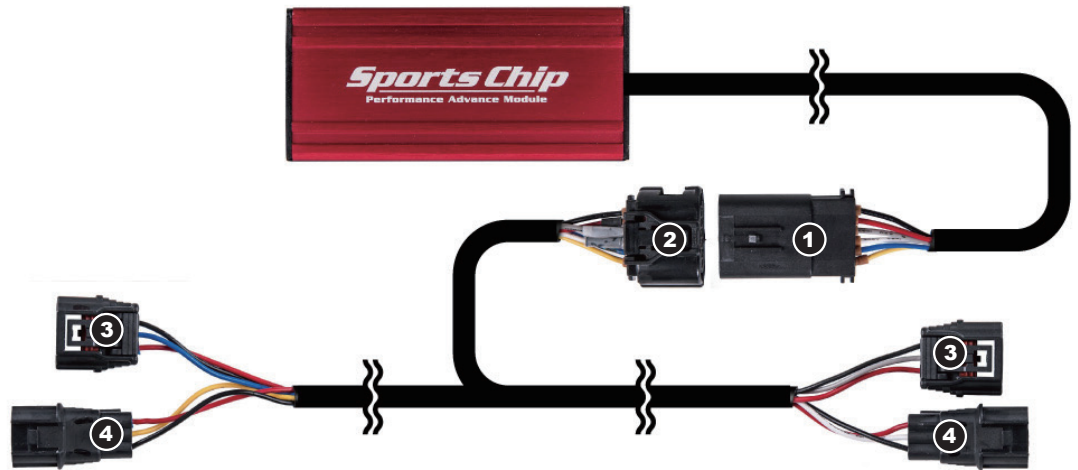

Opening the Sports Chip will void any and all warranties for the device and its operation.

Part List

Please check whether there is a missing item before installing.

			
Sports Chip	Dedicated sensor harness	Recovery Connector	Tie wrap

-  **1** Sports Chip / Recovery connector
-  **2** Relay harness side connector
-  **3** Pressure sensor connector
-  **4** Pressure sensor connector

Sports Chip connection

Relay connector

Connect the pressure sensor harness to the relay connector in the middle of the Sports Chip harness, and then connect the coupler to the vehicle pressure sensor. Please waterproof with vinyl tape so that water does not get directly on the connector.

Intake manifold

There is no problem in connecting the product's harness to either side as both sensors are identical in shape. There are genuine pressure sensors in the main (main) and in front of the throttle body (sub).

! Return of pressure sensor

The relay harness connector is shipped with a connector for normal return. When the check lamp of the vehicle lights up, restore the pressure sensor harness to the normal recovery connector as shown in the photo below, and identify the cause of the failure.
