

Wolf & Shepherd

LOS ANGELES

FOOTWEAR AND PRODUCT DESIGN INTERNSHIP

Apply Now

Wolf & Shepherd, a men's performance dress shoe line, is designed for the high-performing young professional. As a fast-growing lifestyle brand, we are on a mission to debunk the myth that classically styled dress shoes can't have modern technology comforts. We have had early success designing and selling our beautiful (and comfortable) dress shoes, and we are continually looking for ways to innovate and grow our brand.

As a Wolf and Shepherd Intern you get to have real impact on an innovative, fast-growing startup, with mentoring from industry professionals. If you're doing it right there's tons of room to grow here. (Plus, there's a serious chance you'll learn more in 3 months interning than in 3 years of college.)

Interested in Applying?

This is a full-time (40hrs/week) internship at our HQ in Los Angeles, CA (El Segundo to be exact). Please apply only if you are a current student and will be available for 8-10 weeks over the summer.

Depending on experience level, first time interns here at Wolf and Shepherd are unpaid, 2nd year interns receive a stipend, and 3rd year interns are paid.

About the Role

The Footwear and Accessories Design Intern will work alongside our design team to create groundbreaking products that will make their way to the real world.

Under the mentorship of our design team, you will learn and contribute to our design process of research, ideation, sketch reviews, and tech-packing for production across footwear, accessories, and packaging.

This internship is about pushing yourself to learn as much as possible about design and production while making real impact at Wolf and Shepherd. The resources are here for you to

experience rapid growth in your education and experience. If this sounds like the kind of challenge you're looking for, we encourage you to apply.

Skills You'll Need

- Art/ Fashion/ Industrial or Product design background
- Basic Graphic design skills
- Adobe Illustrator and Photoshop proficient
- CAD experience is a plus
- Ability to lift, push, pull and/or carry up to 25lbs
- Ability to multi-task with excellent follow-through and task completion
- Ability to be detail-oriented and stay organized
- Strong team player, ability to work with diverse cross-functional teams
- Creative problem solver; able to work independently to produce quality results
- Thrives in fast-paced environment
