

INSTRUCTIONS:

To determine best fit for Clipons with your existing prescription frame, please do the following:

1. Print this page at 100% size without scaling (i.e. “fit”) to printer margins.
2. Overlay your existing frame on the diagram above. The dashed line (---) represents the point at which the clipon will rest on the frame.

NOTE:

The “Ramp” clipon is designed to fit frames with shallower lens height.

Scale Check
