

# LOOME EYE LOOM HOW-TO

FOR HOW-TO VIDEO: [YOUTUBE.COM/THELOOME](https://www.youtube.com/theloome)

## STEP 1: WARP THE LOOM

PATENT PENDING

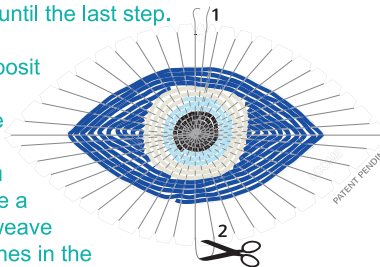

1. Thread a 2<sup>7</sup>/<sub>5</sub> cm tail of the warp yarn through the hole from back to front. Make a tie then pull the end upwards to tighten the tie around the hole.
2. Pull the long end of the warp yarn taut to the direct opposite notch. Note: If the tie moves, simply hold it down with your finger as you complete 2 and 3.
3. Pull the warp yarn to the right around the back of (bottom) notches as the diagram above.
4. Pull taut to the angled opposite notch as the diagram above.
5. Pull the warp yarn to the left around the back of (top) notches as the diagram above, proceed to 6-42.
43. Pull the warp taut to the notch then cut 8<sup>7</sup>/<sub>20</sub> cm tail. Bring the tail over the notch to the back.
44. Bring the tail lightly under the middle "intersection" of all the weft yarn. **IMPORTANT:** Do not pull tightly, work lightly.
45. Pull the tail over the last notch then thread the tail through the hole from back to front then loop the tail to make a tie. Pull upwards to tighten.

## STEP 3: FINISH

### OPTION 1: REMOVE FROM THE LOOM

1. With the tip of a needle, loosen then undo the ties around the hole then leave them until the last step.

2. Move to the direct opposite bottom notch and wedge the loop off the frame then cut the loop. At this point, you have two options A) tie a knot to close it or B) weave the ends into the stitches in the back of your woven eye.

3. Repeat step 2 throughout entire frame. At the end, you will have one extra loose end, weave this into a stitch.
4. Optional: To turn this weaving into a badge, you can secure a backing onto the piece with glue and/or safety pin or sew it on.

### OPTION 2: LEAVE ON THE LOOM

You can display or hang your eye on the loom. "Eye lashes" made with rya knots or tassels can also be added.

## STEP 2: WEAVE THE EYE\*

In addition to the eye, this frame can also weave a circle, a semi-circle or an almond shape. Choose your circle(s) of choice.

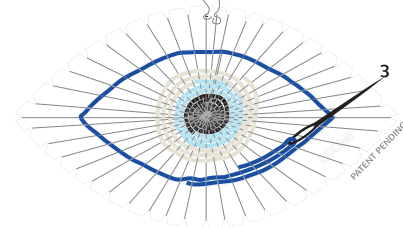

1. For the pupil, thread a needle with 2<sup>7</sup>/<sub>61</sub> cm of black yarn and start a tabby stitch. **IMPORTANT:** Start stitching further from center so you can track your over-under stitches then push and tighten your stitch into the center as you go.

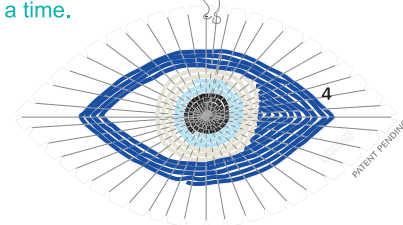

2. For the iris and white, repeat step 1 and continue to stitch the eye out.

3. Optional: To fill in the dark blue, thread a needle with 4<sup>7</sup>/<sub>1.3</sub> m of yarn and start a tabby stitch following the eye cut-out of the frame.

4. Once the dark blue is filled in above and below the eye ball, start stitching in the sides, one side at a time.

5. Flip the frame to the back side. Weave each loose end into the stitch one at a time. Cut the excess tails. **NOTE:** The loose ends for the pupil/black may be very tight and difficult to weave into a stitch, you can simply trim the tail to .25<sup>7</sup>/<sub>6</sub> cm and leave it.
