# POM POM LOOKS

ONE LOOME TOOL CAN MAKE MANY SIZES AND STYLES OF POM POMS. TIP: 1) YARN COMPOSITION, 2) YARN WEIGHT, 3) POM POM SIZE (SEE BACK OF CARD) AND 4) AMOUNT OF TRIM (LOOSE TO DENSE) DETERMINE THE LOOK OF YOUR POM POMS.

TRIM: NO TRIM & FELTED IN THE WASH

### POM POM QUICK REF

it to any notch on either arm of ANY tool model, Wind number of revs for desired size & plumpness (see table to the right). When done, secure to notch and cut tail.

C) Make one tie, not a knot.

(or surgeon's knot) and ∈

TIGHTEN TIE: Pulling close to the knot, make "micro pulls" to further tighten the knot. With one finger on the knot, quickly close out the knot with two more regular knots/ties.

## CUT LOOPS: With very sharp scissors, cut loops.

FIRST TRIM: With a pom pom trim guide (if you don't have one, cut a 1.75" or 4 cm paper) make the first trim. Once done, turn your wrist one turn and repeat (do this because the pom pom is a 3D shape!).

TRIM: LOOSE: Very gently fluff your pom pom and trim off any stray pieces.

TRIM: SEMI-DENSE: & DENSE: We recommend that you supplement this written instructions with our "Orb Pom Pom" video at YouTube.com/TheLoome. Stand up and look down at your pom pom and begin to trim one patch down to the density that

you like. Then start trimming at that density around ONE perimeter, do

not start trimming all over the place. Then repeat this technique for the other sides until finished.

### WHY TIGHT TIE?

Your tight tie keeps your pom pom from falling apart. This is key for pom poms used for knitted/ crochet pieces and iewelrv.

### **HOW TO ATTACH**

Go to YouTube.com/ TheLoome for 2 ways to attach a pom pom.
