

# LOOME LEARN: MINI WEAVING

**LOOME**™

ONE TOOL, INFINITE POSSIBILITIES

## WHAT YOU'LL NEED

1. Loom
2. Wool or Cotton Yarn (for weave or "weft")\*
3. Cotton Yarn (for base foundation or "warp")
4. Darning Needle
5. Scissors (sharp)

## STEP 1

- 1 Secure the end of the yarn to the bottom LEFT notch of the bottom handle.
- 2 Move up the Loom and secure the yarn to the outer notch of the LEFT arm.
- 3 Move down the Loom
- 4 Secure the yarn to the bottom left notch where you started.

## STEP 2

- 5 Repeat for the other side. Secure the yarn to the RIGHT notch of the bottom handle.
- 6 Move up the Loom.
- 7 Move down the Loom.
- 8 Secure tail end of yarn to bottom RIGHT notch and wrap excess string at the bottom handle.

## STEP 3

Back side of the Loom should look as pictured.

NOTE: For setting other Loom tool models, see Step-by-Step How To Set Different Loom Models.

## STEP 4

- Cut 5' of weaving yarn.\*\*

- Thread the yarn for the weaving with a darning needle.

NOTE: Beginners may tie a tight double knot with the tail to the first string of the foundation.

## STEP 5

- With a darning needle, send the yarn UNDER the outermost RIGHT base foundation string then OVER the inner RIGHT base foundation string then UNDER then OVER.

- Circle back with alternating UNDER, OVER, UNDER then OVER.

- Repeat over and over.

## STEP 6

- You will see the 4 string weave pattern form after several weaving repetitions.

## STEP 7

- Use the darning needle or your fingers to push the weave down to stack them tightly together to form a clear tight weave pattern.

- Continue weaving until you cover the length of the cord you wish.

- Once you've weaved to the top, cut the yarn leaving a 6" tail.

## STEP 8

- Close each end of the yarn by tying tight double knots to one of the base foundation string/yarn/cord.

## STEP 9

- Remove the weave by unsecuring the cord from the bottom of the handle and gently pull it off the top arm. Cut excess ends.

PRO TIP: You can dab glue on the tip of each knot to make sure they don't come undone with wear.

## COMPLETED

Mini weavings are cool! A little more creative and we'd love to see what you make - share with us with #myloome.

\* For beginners, we recommend medium wool or cotton yarn because it will weave quickly and nicely. Please see our material chart at [theloom.com/materials](https://theloom.com/materials) for other recommendations.

\*\* The length you need will vary based on the thickness of yarn used. For medium yarn, 5' is perfect. For thicker and thinner yarn, you may adjust slightly - less for thicker and more for thinner.
