

TOO *cute* BEADS

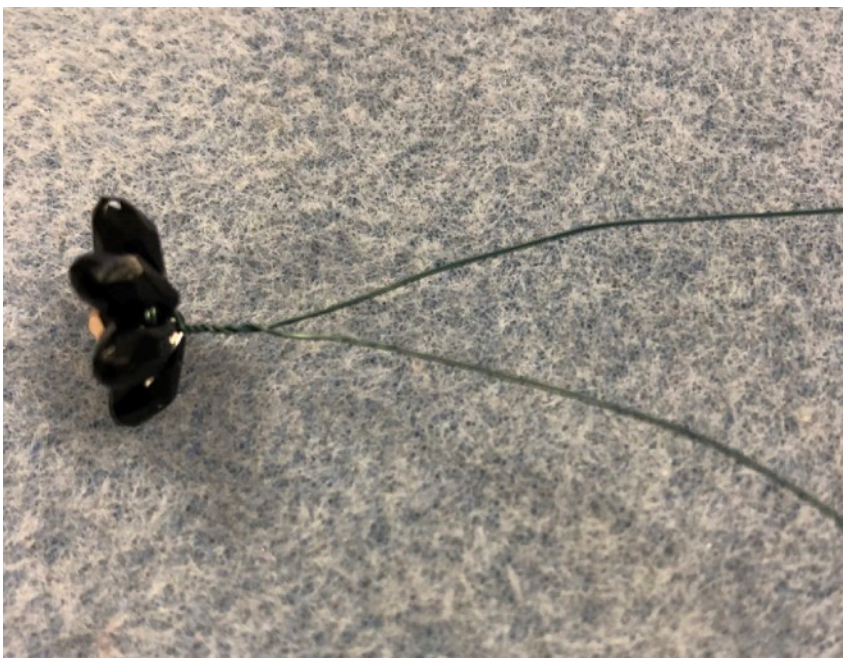

Crystal Creations - Rose Gold Flower

Cut your green wire into 3 equal sections and set 2 aside. On one piece of green wire load your 6 black briolette pendants.

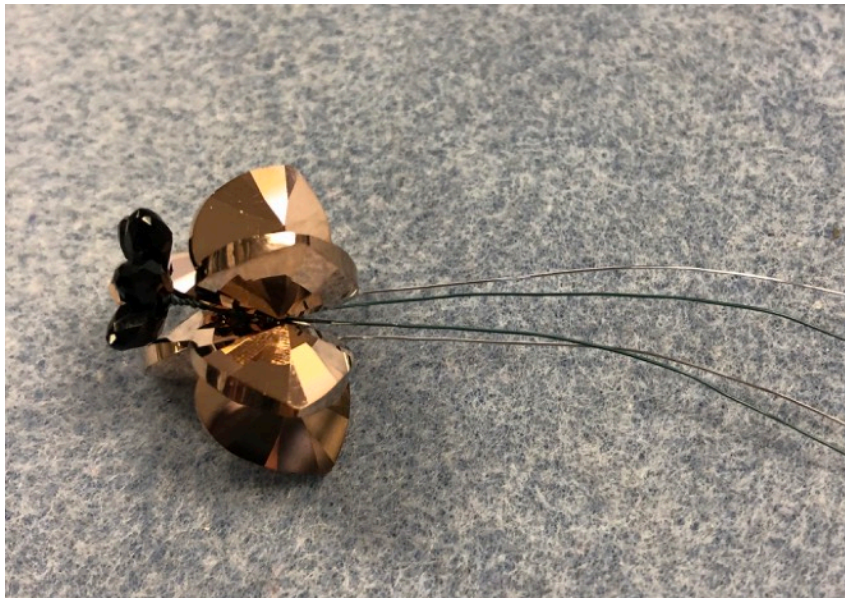

Back through 3 pendants and pull tightly to create your flower. Cross both ends of your wire through your 4mm Rose Gold round bead, making sure the Rose gold is facing forward.

Pull your wires tightly, and bring them to the back of your flower, and begin twisting your wire. Set aside.

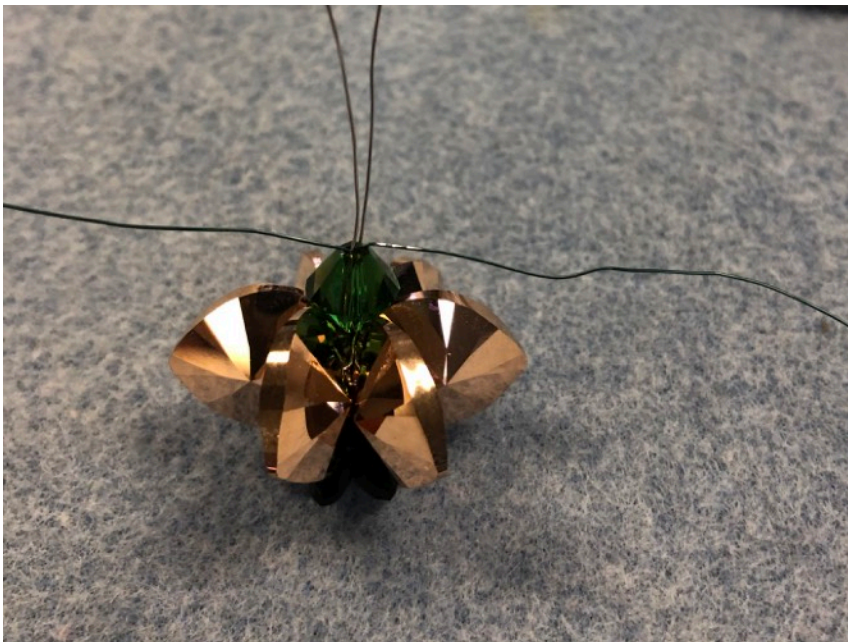

String 6 heart pendants onto your silver wire and go back through 3 heart pendants. Pull tightly and bring your wires to the back

Run the green wire through the front of your flower, twisting your green and silver wire together 3 to 4 times.

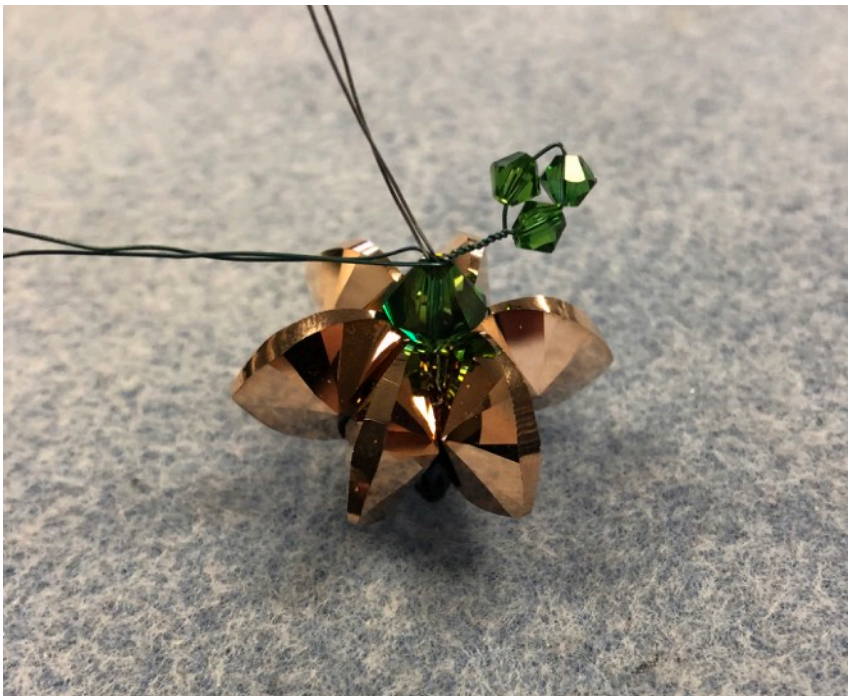

Take all 4 wires through your large green bicones

Separate your green wires

Add 3 bicones to 1 of your green wires.

Close to the stem, pinch your bicones, and twist towards the large bicone. Repeat on your other green wire. Trim excess green wire, and set aside.

With our remaining green wires, we will need to create our leaves. If this is your first Crystal Creation you can find this guide for this at <https://www.toocutebeads.com/assets/images/How-to-make-crystal-flowers.pdf>

Once you've created both sets of leaves, twist them together up at your large bicone.

Twist your leaves into your silver wire, and arrange as desired.

Take all your wires through your large jet round. Apply E-6000 to the bottom of your round bead, and attach your disc bead to create the base.
