

Model	BBT-271 A	DMT-489 BL	NCT-336 BLU	DTR-1835
Type	Basal Body Temperature Thermometer	Contact Thermometer	Non-Contact Thermometer	Digital Thermometer
				
Purpose	This thermometer measures basal body temperature. Or, waking temperature. It's not a regular thermometer that indicates if you have a fever. Rather, it tells you based on a rise in your temperature if you are within your fertile window or ovulation.	This thermometer measures temperature via ear and forehead.	This thermometer measures temperature via forehead. Touching the forehead is not necessary. The thermometer gives the most accurate measurements at a distance of 2 to 6 inches.	This thermometer measures temperature orally or rectally.
Suitable for children	No	Yes, the ear function is suitable for children of 6 months and older. The forehead function is suitable for all ages.	Yes, this thermometer is suitable for children of all ages.	Yes, the rectal function is suitable for children of all ages. The oral function is suitable for adults.
Measurement time	60 seconds	1 to 5 seconds	1 second	20 seconds
Fever Indication	No	Yes	Yes	Yes
Why should you buy this thermometer	If you and your hubby want to plan your family naturally, this is the thermometer for you. As a TTC mom, it will give you a clear overview of your cycle and help you to indicate your ovulation.	This thermometer is a must in a household with young children. It has a built-in fever indicator and a backlight display. It makes measuring the temperature of your kids easy peasy under any circumstances. You'll have a good idea of the situation at hand.	If you have a wiggly baby in your household, this thermometer is for you. Unlike traditional thermometers, this one doesn't require contact with the skin. With the additional function of muting the sound, it's great to use this thermometer when your baby is asleep and you still need to measure baby's temperature.	This thermometer has the best of both worlds. Its measuring time is as short as possible without compromising its accuracy. In a household of grownups and kids, it's a thermometer that serves all purposes. (Don't forget to add a pack of probe covers if multiple people use the same thermometer.)
