LIGHTS™

Instruction Manual

Shelby Head Lamp/Bicycle Light

Made In USA

Parts List and Introduction

SHELBY

Congratulations on being the proud owner of Clearwater Lights' Shelby Head Lamp & Bicycle Light! With a powerful 12W LED inside a durable aluminum housing and four lithium-ion batteries, you'll never be in the dark again! Please read these instructions to learn how to get the most out of your new light.

Parts List

- Charger with 8.4V 2A output
- Battery pack with (4) Lithium Ion 3.7v batteries
- Headband mount
- Bicycle helmet mount
- 3 foot long extension cable
- 2 x O-ring sets
- Wide Oval Beam Lens

Shelby Functionality & Modes

The new Clearwater Shelby bike light is durable and has five light modes: High, Med, Low, Extreme Low and Strobe. **Pressing the on/off button toggles through each of the modes.**

Mode 1: "High mode" 900 lumens, @ 3h 40m ~ 4h battery life

Mode 2: "Med mode" 450 lumens, @ 7h 30m ~ 8h battery life

Mode 3: "Low mode" 225 lumens, @ 15h battery life

Mode 4: "Extreme Low mode" 100 lumens, @ 33h battery life

You get three lights in one!

*A bicycle light that mounts to your handlebar.

*A bicycle light that mounts to your helmet.

*A hands-free working light with a head band mount.

Note: Don't look directly into this light while on High. The High mode is really bright! It is best to reserve the High beam setting for use while on the move or with some wind, as the housing can get quite warm to the touch and the moving air helps cool the light. When in a stationary position, try using one of the lower power settings. They are still quite bright!

Thank you for purchasing your **Clearwater Lights**. We hope this product will help make you a safer rider. Please feel free to send us comments or suggestions at any time. We learn from you. Visit our website for more exciting products to help you see better at night.

Ride safe!

Sincerely,

Glenn and the team at Clearwater.
