

Explosion-Proof Lighting for Your Toughest Work Sites

It's the most recognized handlamp in the industry and for good reason: it's rugged, dependable and designed to allow use in the most hazardous of work areas. The DWXPLEDIL50-12V provides low-voltage, safe lighting thanks to its inline transformer and its quality materials and construction.

Bright: 8 w LED lamp casts 600 lumens in your work area, eliminating shadows and enhancing safety.

Portable: At only 20 pounds, the unit is not so heavy for crews moving quickly. WorkSite lighting can provide custom cord lengths for sites needing more than the 50' standard secondary cord. Hanging hook comes standard.

Versatile: Great in confined spaces, drums, vessels, wet locations and fueling areas. Near limitless options for use.

Durable: Cast aluminum housing with a tempered soda lime glass dome. Aluminum cage to protect the globe and bulb. These units can take a beating and keep going. Easy to repair and service.
