

# PetroPro Handy & TankPro Handy

## “Pro” Series Safety and Performance... in a Durable Handheld Unit!

The PetroPro Handy and the TankPro Handy may be the “little brothers” of the PetroPro MAX and TankPro MAX, but these lights are big on safety, portability and performance! Like all lights in our Pro series, the PetroPro Handy (120 volts) and the TankPro Handy (12 volts) are nearly indestructible, with a milled-aluminum frame, and vibration-resistant LEDs. No handheld light on planet earth matches the toughness of your work crews like the PetroPro Handy and the TankPro Handy.

**Bright:** Both the PetroPro Handy and the TankPro Handy deliver more than 7,000 lumens to your work area, with true-to-color light quality, similar to natural sunlight.

**Low-profile:** At only 14” x 6.5” x 5”, and just 20 lbs., the Handy series lights can go anywhere your workers go, and fit through tight spots that few other certified lights can. Its compact, lightweight design means you will find a new use for it every day on your work site!

**Safe:** These lights are half the size of the Petro Pro MAX and Tank Pro MAX, but there is no loss when it comes to safety ratings. Like their MAX-sized brothers, Handy series lights are rated for use in more hazardous environments than any other light in the world. Both the PetroPro Handy and the Tank Pro Handy are Class 1 Division 1 rated. The Tank Pro Handy takes it one step further, being OSHA compliant for tank lighting, and featuring a rating for painting and coating environments.
