

SLDWVP120 Series Stringlights

8w Watertight LED Handlamps Available in 5, 8, 10 Lamp Strings

When you need to get as much light as possible into a very small area, string lights are a great option. These 8w watertight LED handlamps are just like their single-issue counterparts, but they combine to overlap their lighting fields, creating a wider zone of light. WorkSite Lighting offers many customizable options on string lights, and can create, service and repair these lighting units very quickly.

Safe: The 8w watertight LED handlamps used in our string lights are the same high quality lights we use in our single-lamp products. Features single-piece moulded handles and grounded steel guard.

Bright: Each 8w LED handlamp generates 600 lumens in your work area. Combine the handlamps together in a string, and you have flexible area lighting where it's needed most.

Rugged: Wet-location rated, and outfitted with LED bulbs, these lamps are much more resistant to vibration and shock than incandescent bulbs, and will last much longer than non-LED lamps in the field.
