

# SLDWXPLED-120 Series String Lights

## 8w Explosion-Proof LED Handlamps Available in 5, 8, 10 Lamp Models

When you need to get as much light as possible into a very small area, string lights may be just the option you need. These 8w LED explosion-proof handlamps are just like their single-issue counter-parts, but they combine to overlap their lighting fields, creating a wider zone of light. WorkSite Lighting offers many customizable options on string lights, and can create, service and repair these lighting units very quickly.

**Safe:** The 8w LED handlamps used in our string lights are the same high quality workhorses we use in our single-lamp products. Explosion-proof, durable, with aluminum housings and cages as well as tempered glass domes.

**Bright:** Each 8w LED handlamp generates 650 lumens in your work area at a fraction of the energy required of incandescent lamps.

**Portable:** The whole string can be managed by one or two workers. Spacing between lamps is customizable according to customer need.
