## **SW-UL-3.5 or SW-UL-2.5**

### Determining The Correct Size Jack

There is a very simple way to determine if your shoulder (paddle) microphone supports an earpiece with a 3.5mm jack or a 2.5mm jack.

Find a set of earbuds or headphones that work with your cell phone. The cell phone jack will be a 3.5mm jack. If the earbuds or headphone jack fits in your shoulder mic then you need a 3.5mm jack. If the earbuds jack is too big for the shoulder mic, then you need a 2.5mm jack on your earpiece.
