Heavy duty wheels made of cast nylon

肾 100 - 50000 kg

√RoHS

GSPO-wheel series:

 $\label{eq:made_equality} \textbf{Made of high-quality, impact-resistant, hard and}$ tough, highly compressed cast nylon with extremely high load capacity, 80° shore D hardness, very low rolling and swivel resistance, smooth running performance on even floors, high abrasion resistance, colour natural beige. (Material description page 40)

Bearing types:

- Ball bearing: Two pressed-in ball bearings, lubricated with long-life grease.
- Spherical roller bearing: Two pressed-in spherical roller bearings, sealed, extremely rugged, very durable, lubricated with long-life grease.

Other features:

High chemical resistance to many aggressive substances (table page 36-37). Operating temperature: -25° C to $+80^{\circ}$ C. At ambient temperatures above +35° C the load capacity is reduced.

The relatively high floor pressure should be considered for pressure-sensitive floors.

Maintenance-free under standard conditions.
