

Instructions for carrying Surfboard

1. Lay McSling on ground with the label facing up.

2. Wrap the surfboard

3. Test for balance – move strap to level

4. Adjust body loop opening; add Marker

5. Arm, shoulder or head into body loop opening

Enjoy carrying your surfboard hands free.

Note: McSling is intended for carrying ~25 lbs or less while walking. Consult a physician regarding your ability to carry the weight on your shoulder. Be aware of your surrounding with the board and travel at your own risk.

Instructions for wearing Sling

1. Hold McSling with the label facing down and fold

Buckle at fold

2. Wrap around waist

3. Secure

Note: The ocean can be a turbulent environment. To prevent possible loss of McSling check that the hook and loop are secure throughout your surf session.
