

1. Lay sling down with label facing up (Snowboards skip to Step 3)
2. Place poles centered approximately 4 inches apart with one pole on "Box X" **
3. Place skis on poles or snowboard centered (balanced – Fig 6.) on sling
Repeat steps 2 and 3 (2B & 3B) for multiple sets of skis
4. Connect male and female buckle
5. Hold strap from female side buckle **ALWAYS** keeping tension on strap wrapping skis and pole. The cinching action holds ski and poles or snowboard in place.
Thus: **No tension – No cinching!**
6. Wear on shoulder or across body; Position skis in horizontal or vertical position
**Note: both poles can go on one side rather than on the bottom

Please Note McSling can be attached with skis or snowboard standing up (vertical)
