2018 Soil Fertility Workshops

Back to Soil Fertility Basics

Our workshops cover a wide range of topics that help reinforce basic concepts in soil fertility, soil chemistry, and the complex interactions in crop nutrition and production. The relaxed format of the workshop allows us to interact closely with those attending. Informative group discussions create a challenging atmosphere for the entire workshop audience. Throughout the day, real-life agronomic problems are posed to the group and suggested solutions are discussed.

CCA continuing education units have been applied for at 4.5 in Nutrient Management, 2.0 in Soil and Water Management and 0.5 in Crop Management. Our seminars are presented by certified crop advisors (CCA) and certified professional agronomists (CPAg). Topics will include fundamental soil properties, CEC, base saturation, soil pH, nitrogen management, phosphorus, potassium, secondary and micronutrients.

Registration is Required

The cost of the workshop is \$110.00 per person and includes all necessary reference materials. A light breakfast and catered lunch is included. To register for a workshop, complete the attached registration form and mail it to us along with the appropriate payment. Please include a list of names of those attending.

Workshops begin at 8:15 am, plan to arrive 15 to 20 minutes early to sign in. Workshops will adjourn by 4:30 pm.

You must pre-register at least two weeks before the date of the workshop. The size of the group may be limited by the facility. A refund will not be given if you cancel within seven days of the workshop date.

A & L Great Lakes Laboratories reserves the right to cancel a workshop due to inadequate registrations, or reschedule due to inclement weather. Registration is required so that we can contact participants in the event that a workshop is postponed or cancelled.
