

## RideSafe Measuring Tape and Fitting Guide - Step 1

Print this page; it is important to make sure that you set print scaling to “Actual Size.” Cut along the dotted lines; this will leave you with three strips. Overlap the letters on the ends of the strips (A A with A A and B B with B B) with all text facing up to the orange line. Tape these pieces together, until you have a single measuring tape that looks like this:

Follow the directions on the measuring tape. Your head size is shown where the arrow meets the letter.

Please print this page with print scaling set to “Actual Size” as shown in the diagram. This will ensure that the measuring tape is accurate.
