BEFORE YOU BEGIN

Before beginning assembly, make sure all parts are present. Compare parts received with the "Package Contents." If any part is missing or damages, do NOT attempt to assemble the product. Please read and understand this entire manual before attempting to assemble, operate, or install this product. If you have

SAFETY INFORMATION

WARNING

DO NOT stand or allow children to stand on the assembled product. DO NOT place anything on top of the assembled product. DO NOT tighten screws completely until instructed to do so. After final alignment, make sure all hardware is securely fastened before attempting to move the unit. NEVER use a power tool to assemble or adjust your item. Perform periodic checks to make sure the hardware is secure and tighten if needed.

CAUTION

Read all instructions before beginning assembly. Failure to do so may result in faulty assembly and potential injury. Assemble the item on a soft, non-abrasive surface such as a towel or blanket to avoid damaging the item.

CARE

When wind guard is completely cool, it may be cleaned with a soft cloth or paper towel and standard glass cleaner. Never spray cleaner or water on a hot wind guard, as it could crack or shatter.

Store the wind guard in a safe place during poor weather or when not in regular use.

NOTE: Each of the eight wind guard brackets should arrive with two flat-ended screws pre-assembled in the bracket. Each screw should have a clear rubbery pad/cap at the inner tip that protects the glass panel from the screw and helps hold the panels in place. Sometimes small parts can rattle loose in shipping, so check each bracket and screw for proper assembly before assembling the wind guard. If any screw or screw pad is missing, check the packaging for the hardware and the shipping carton.

Contact Customer Service at cservice@welltraveled.net for replacement parts if necessary.

To replace a screw pad:
Press the clear pad into the tip of the screw

To replace a screw:
Screw the screw partially into the bracket (do not fully tighten)

PREPARATION

Before beginning assembly, be sure to empty contents of carton and make sure all parts are present. If any parts are missing, please contact Customer Service at **(866) 985-7877**, 9 a.m.–9 p.m., EST., or email **cservice@welltraveled.net**.

Carefully remove the glass panels from the packaging and inspect for any damage such as chips or cracks. Place glass panels on a soft, flat surface to prevent any damage. Before assembly, ensure that each bracket has 2 set-screws, with silicone pads attached at the tip.

Estimated Assembly Time: 30 minutes | Do NOT over-tighten hardware!

- 1** You will assemble the wind guard upside-down. It is recommended to assemble on the floor on a protected surface such as a blanket to avoid accidental breakage.

Arrange the four glass **Panels A** in a circle.

Verify that all **Brackets B/C** are assembled with a plastic bumper pad at the tip of both set-screws and with the set-screws loosened adequately to allow the brackets to slide easily onto the glass panels.

- 2** Slide a **Top Bracket B** onto the junction of two **Glass Panels A** as shown.

Align the **Bracket** with the lower (top) edges of the adjoining **Panels**.

Verify that the bumper pad is in place at the tip of each bracket set-screw. **Do NOT tighten the screw directly to the glass if the pad is missing.** Check the carton for spare pads, or contact Customer Service.

Check alignment, then carefully tighten set-screws until snug. **WARNING: over-tightening can break glass!**

Continue to join **Panels** one at a time by the same procedure until all four panels are joined to form a complete circle. Once all four **Top Brackets** are in place, check the security of all eight set-screws.

Hardware Used: **B Top Bracket** x4

3 Carefully slide a **Bottom Bracket**  onto the top of each panel joint, with the cushioned foot pad pointed UP.

Align the edge of the metal **Bracket** with the edge of the two glass panels, adjusted so the foot pad will hold the assembled wind guard slightly off the table surface when placed upright.

Verify that the bumper pad is in place at the tip of each bracket set-screw. **Do NOT tighten the screw directly to the glass if the pad is missing.** Check the carton for spare pads, or contact Customer Service.

Check alignment, then carefully tighten set-screws until snug. **WARNING: over-tightening can break glass!**

Install the remaining three **Bottom Brackets** in the same manner.

Hardware Used:  **Bottom Bracket** x4

4 Carefully (using two people if possible) turn the assembled wind guard upright. Gently set the glass guard onto the fire pit table, positioning the feet flat and level outside the edges of the burner. Check that the bottom edges of the glass panels are not directly touching the tabletop, and are held off slightly by the foot pads of the lower brackets. Ensure that the foot pads are not sitting directly on the fire bowl.

Be aware that the glass and hardware may become warm or hot after prolonged burning of the fire pit and take reasonable precautions to avoid burns.
