

COATS®

Coats® Autoflate Digital Inflator

Provides greater accuracy to defy today's TPMS issues

Tire Pressure Monitoring Systems (TPMS) create several challenges for tire service professionals—especially frequent comebacks from incorrect tire pressure. Most current TPMS systems require a range of +/- 2 PSI, which is difficult for hurrying technicians to achieve with inaccurate gauges.

Introducing the time-saving Coats® Autoflate – today's first UL-approved digital inflator. With accuracy to +/- 0.5 PSI, Autoflate guarantees uniform pressure in all tires, virtually eliminating comebacks due to TPMS issues.

REDUCES CYCLE TIME BY UP TO 3 MINUTES ON A TYPICAL 4-TIRE TICKET

With Autoflate, technicians don't have to wait by the tire changer while the tire inflates. Inflation can be carried out off the tire changer, so the technician can be changing the next tire while inflation occurs. For the average shop, this can mean 5%–10% more jobs per day. Just set the pressure, attach the chuck, and press "Start." Autoflate does the rest.

FEATURED ITEM

Autoflate

Part No. 85009184

- Accurate to +/- 0.5 PSI
- Highly intuitive, easy-to-use design
- Inflates a typical tire in 40 seconds (with 150 PSI inlet pressure)
- Heavy-duty grip chuck seals and holds on stem
- Rounded grip chuck end prevents scratches in stem area
- Automatic pause at 40 PSI requires technician override, enforcing today's bead-sealing best practices
- Nitrogen-ready – a quick keypad sequence switches from Air to Nitrogen mode
- UL / CSA / CE / ETL approved
- Auto-start feature will start and inflate tire to desired pressure automatically if tire has air pressure when the chuck is attached

Also Available: Coats® Air-Check

Part No. 85009939

A fast, efficient way to get customers' tires to the right pressure while they're still on the car. Just set the pressure, attach the chuck to the car tire, and move to the next wheel when the unit beeps.

- Not for bead seating use
- Shares same features and benefits of Autoflate, but does not automatically stop at 40 PSI
- Comes with rubber hose for easy attachment to standard air hose reel (25' coil hose not included)

ACCESSORIES

Mounting Bracket for Coats® APX Tire Changers 85000675

Allows Autoflate to be mounted directly to APX robo-arm tower.

Extra Grip Chuck 85008903

Rebuild Kit for Grip Chuck 85009061P

Extra 25' Coil Hose (includes hose only) 85008904
