

- 1) Hold the buttons on your lights for 3 seconds to unlock them.
- 2) Click to scroll through the 6 default modes.
- 3) Put your gloves on and feel how the lights react in sync with your movements.

The Element V2 has been refitted for a smoother feel and default software made to pair perfectly with your gloving style. Some modes will fit naturally your current style, while others will test you a bit more. These motion reactive modes were crafted with immense care by working hand in hand with top glovers in the scene. And they're all gorgeous. So let's get started!

## MODE 1 - FESTIVAL SET

We thought we'd start V2 with a set that's just pure fun so you can click your lights on at a festival and instantly blow minds. When you move slow or come to a sudden freeze, the cool flashing whites in Set 1 mesmerize your audience. Then when you speed up, the warm tropical colors in Set 2 explode out of your lights with incredible blends. The Festival Set guarantees to melt the faces of innocent strangers.

**Glovers to watch:** Team [e] Blitzen, [NL] TriggHappy, [PM] Panda, Team [e] Socks

**Set 1**  
Color Set 1 - Silver<sup>M</sup>, Tombstone<sup>M</sup>, True White<sup>H</sup>  
Flashing Pattern 1 - Hyperstrobe

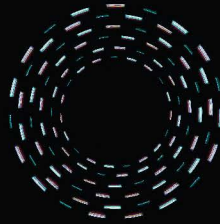

**Set 2**  
Color Set 2 - Cyan<sup>M</sup>, Lavender<sup>M</sup>, Tombstone<sup>M</sup>,  
Orange<sup>M</sup>, Lime<sup>M</sup>, Lime Green<sup>M</sup>  
Flashing Pattern 2 - Strobe

Motion Type - Speed  
Resistance Level - Low

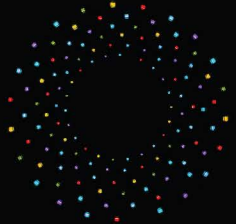

### Teddy's Tips

**Recommended Color Sets:** Use cool colors for one set, and warm colors for the other set to create a jarring color-change effect.

**Recommended Flashing Patterns:** Use distinct patterns that look different from each other when idle (ex: Strobe to Tracer).

Set 1

Set 2

## MODE 2 - ALL AROUND

Great for glovers of all skill levels and like to incorporate lots of different styles and tempos. This mode features the new Flux Motion, a simple yet blissful blend of 3 individual colors at 3 different speeds. It is compatible with all 12 of the Element's flashing patterns and can be set to automatically add gaps via the Yellow programming level.

**Glovers to Watch:** [PM] Ice Cream Teddy, [IM] Puppet, [3M] Jest, [PM] Rhapsode

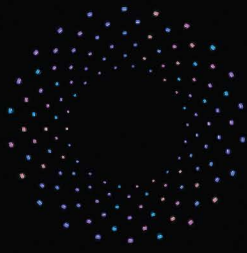

Color Set - Cosmic Owl<sup>H</sup>, Lens Flare<sup>H</sup>, Cyan<sup>H</sup>  
Pattern - Strobe

Motion Type - Flux  
Gap Option - 1 Gap Added

### Teddy's Tips

**Recommended Color Sets:** All colors blend nicely with Flux Motion, whether they're opposing or close together on the color wheel.

**Recommended Flashing Patterns:** Strobe and Strobe both look great with Flux. If you're adding 2 gaps, try Shadow, Centerpoint or Chroma.

Flux Motion

## MODE 3 - TUTTING

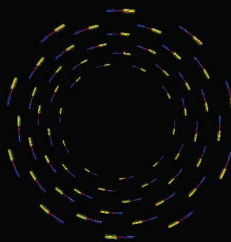

Explore angles and boxes with your arms and hands. The lights will display one pattern when you're pointing them up to the sky, then naturally change to their second pattern as you point them down to the ground. This mode utilizes an improved Tilt function that responds with perfect accuracy. You can even change the angle that it transitions at to suit your style.

**Glovers to watch:** [PM] JBake, [PM] Gambit, [TM] Serj

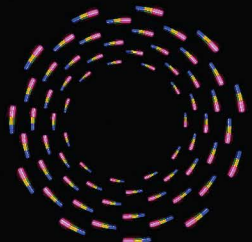

**Set 1**  
Color Set 1 - Lime<sup>M</sup>, Light Pink<sup>L</sup>, Light Blue<sup>L</sup>, Blank,  
Blank, Blank, Blank  
Pattern 1 - Chroma

**Set 2**  
Color Set 2 - Light Pink<sup>H</sup>, Lime<sup>M</sup>, Light Blue<sup>L</sup>,  
Blank, Blank, Blank, Blank  
Pattern 2 - Ultra Dops

Motion Type - Tilt  
Tilt Range - Wide

Set 1

Set 2

### Teddy's Tips

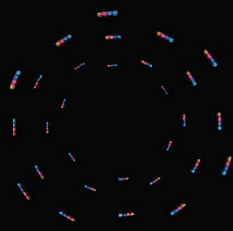

**Recommended Color Sets:** "Up" set should look vastly different from the "Down" set to emphasize the angle of your hand.

**Recommended Flashing Patterns:** Choose patterns that have a subtle, but noticeable difference between each other like Chroma to Ultra Dops or Hyperstrobe to Strobe.

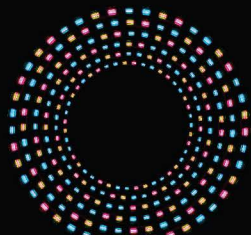

This mode was designed for glovers whose smallest movements are their biggest assets. Perfect for digits, dials, threads, clocks and other individual finger-based tricks. With Low Speed Resistance, the lights are very sensitive to every little wiggle. This allows you to focus your attention on the movements of each finger as you move.

#### Set 2

Color Set 2 - Light Blue<sup>H</sup>, Tombstone<sup>H</sup>, Snarf<sup>H</sup>,  
Cosmic Owl<sup>H</sup>  
Pattern 2 - Strobe

Set 1

Set 2

#### Teddy's Tips

**Recommended Color Sets:** Small tech moves look great when the color sets are slightly similar to each other, but not necessarily identical.

**Recommended Flashing Patterns:** Blinking patterns for the "Slow" set (ex: Strobe, BlinkE), and solid patterns for the "Fast" set (ex: Chroma, Centerpoint).

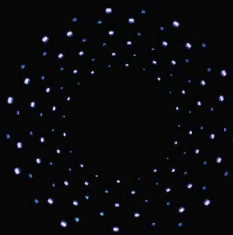

### MODE 5 - MUSICALITY

A great light show requires the glover to match his or her movements to the beat and the feeling of the music. This mode accents your movements with a smooth, subtle addition of Lime as you speed up, making high-speed to low-speed transitions a dream. Maximize the music at all speeds with perfect color transitions and a constant strobe pattern.

**Glovers to Watch:** [PM] Cypher, Medusa, [PLL] Vex, Tranquil

#### Set 1

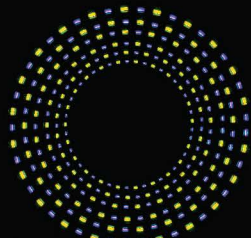

Color Set 1 - Lens Flare<sup>H</sup>, Tombstone<sup>L</sup>, Blank  
Pattern 1 - Strobe

Set 1

#### Set 2

Color Set 2 - Lime<sup>H</sup>, True White<sup>M</sup>  
Pattern 2 - Strobe

Set 2

Motion Type - Speed

Resistance Level - Medium

#### Teddy's Tips

**Recommended Color Sets:** You can be very versatile with colors in this mode. Try using the same High colors in both sets, or try using the same tint layout on both sets (ex: H-M-L-Blank).

**Recommended Flashing Patterns:** Go with either matching flashing patterns (ex: Strobe to Strobe) or go from a blinking pattern to a more trailing pattern (ex: BlinkE to Dops).

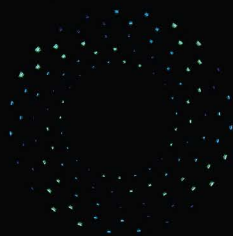

### MODE 6 - WHIPS AND FLOW

If you've got clean whips, buttery liquid and an overall flowy style, this mode will look plain sexy. This aquatic set starts off with a classic Strobe to keep the lights popping in slower movements, then bursts into raindrops of Dops when you trace the circles you create.

**Glovers to Watch:** [LOL] Flow, [T4S] Materia, [LIT] Stasis (Ayo?) Boo

#### Set 1

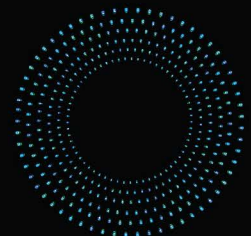

Color Set 1 - Mint<sup>H</sup>, Mint<sup>H</sup>, Cyan<sup>M</sup>, Cyan<sup>M</sup>, Tombstone<sup>L</sup>,  
Tombstone<sup>L</sup>  
Pattern 1 - Strobe

Set 1

#### Set 2

Color Set 2 - Mint<sup>H</sup>, Mint<sup>H</sup>, Cyan<sup>H</sup>, Cyan<sup>H</sup>, Tombstone<sup>H</sup>,  
Tombstone<sup>H</sup>  
Pattern 2 - Dops

Set 2

Motion Type - Speed

Resistance Level - High

#### Teddy's Tips

**Recommended Colors:** Try using the same colors on Sets 1 and 2, but make Set 2 colors all High tint for a "louder" effect.

**Recommended Flashing Patterns:** Anything blinky for Set 1, and trippier ribbon-based patterns like Dops, Ultra Dops, Centerpoint or Chroma.
