The Sightmark® series of reflex sights are designed to create a lightweight, yet accurate, sight. Sightmark reflex sights are able to handle heavy recoil, will stay zeroed in longer than competitor's reflex sights and are perfect for shotguns, pistols and rifles. The Mini Shot™ is the most compact in the Sightmark line; it is super light and extremely accurate for its minute size. This reflex sight features a 3 MOA dot illuminated reticle and is useful for most any application from close quarter combat situations to hunting. To create the ultimate weapon, mount the Mini Shot alongside a riflescope in order to quickly acquire targets at close distances and take long shots with the riflescope.
