The **Sightmark Ghost Hunter 1x24 Goggle Kit** is an night vision monocular that can operate with or without an IR illuminator. The IR illuminator is recommended for use in total darkness or a night when the moon is not in sight. Equipped with a head mount for hands free use, the Sightmark Ghost Hunter can be used for hours in comfort. The Sightmark Ghost Hunter is a must have tool for hunting, tourism, search and rescue, airsoft and paintball events. The user can estimate the distance to an object easily and accurately, which is great for viewing objects in motion. This product is protected by Sightmark's limited lifetime warranty.
