The **Sightmark Core Shot Reflex Sight** is a unique, midsized, lightweight reflex sight in the Sightmark reflex sight family. Its compact size improves the shooter's field of view of the surrounding environment. Specifically designed to maintain all important peripheral vision and depth perception, the Core Shot is designed to be fired with both eyes open. The Core Shot features a digital switch with six daytime and night vision reticle brightness settings. Perfect for shotguns and rifles, the Sightmark Core Shot is able to withstand heavy recoil with two locking screws that lock in windage and elevation adjustments.
