Summary of Services

AutoDeriva is a small, privately owned CNC machine shop. Our company focus is on quality and customer needs. We are mainly a high mix low volume prototype and spares job shop with short lead times serving the aerospace and defense industries. We offer 3, 4, and 5 axis milling, and CMM inspection. We primarily work with aluminum, but have experience with almost all machinable materials. Most of our experience comes from second tier work in the aerospace and defense industries.

Capabilities

- 5 Axis CNC Milling
- 4 Axis CNC Milling
- 3 Axis CNC Milling
- CMM Inspection
- Light Assembly (helical inserts, keyed inserts, press fit pins, bearings, etc)
- Finishing (chem processing, heat treat, NDT, plating, etc) through our approved supplier network

Differentiators

- Business leadership that focuses on a culture that drives quality, ethics, innovation, and improvement
- Capable of as short as 24hr turnaround on specific jobs
- Extreme dedication to quality, on time delivery, and customer satisfaction
- Experience with Primes, Aerospace, and Defense
- As of Q2 2021 we have never issued an RMA; have never had a quality issue or concern from any customer on any job that has shipped out from our facility
- Accredited network of approved vendors for chem processing, calibration, finishing, NDT, and more
- Extremely small business that naturally allows us to care more about what we do and have more hands directly on the processes

Awards, Recognition, Quotes

- Xometry 2020 Excellence in Manufacturing Award
- Xometry 2019 Excellence in Manufacturing Award
- “Your shops reputation and body of work has generated some exciting buzz within our engineering team, and this conversation has only instilled us with more confidence and value in AutoDeriva. We look forward to building our relationship and seeing what the future brings.”
-Ben Catlett, Xometry
