Shadowing/Silhouette Lighting

Directs the eye to the textures, shapes and height differences of items in plant beds, adding depth and ambiance. Draw attention to an interesting shape by lighting a vertical surface behind the object to accent that unique shape.

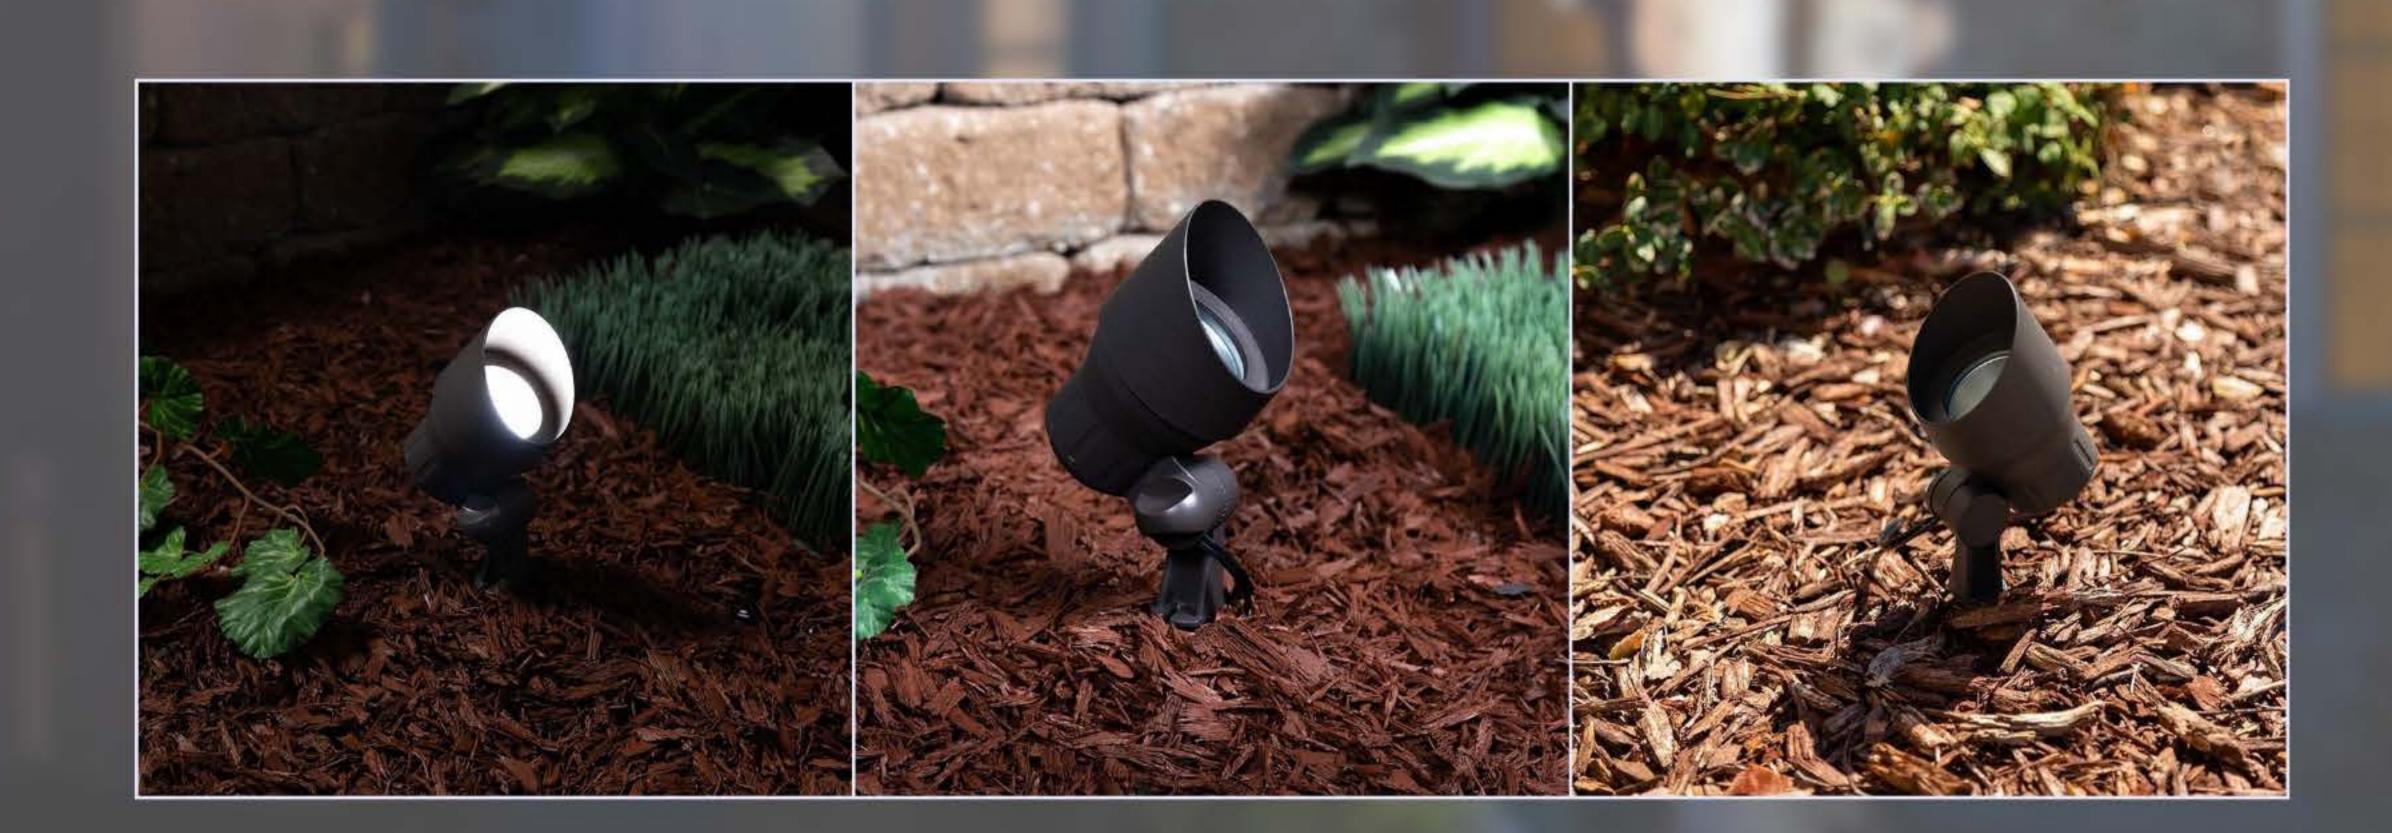

LANDSCAPE BULLET LIGHT 7W 3CCT 1068

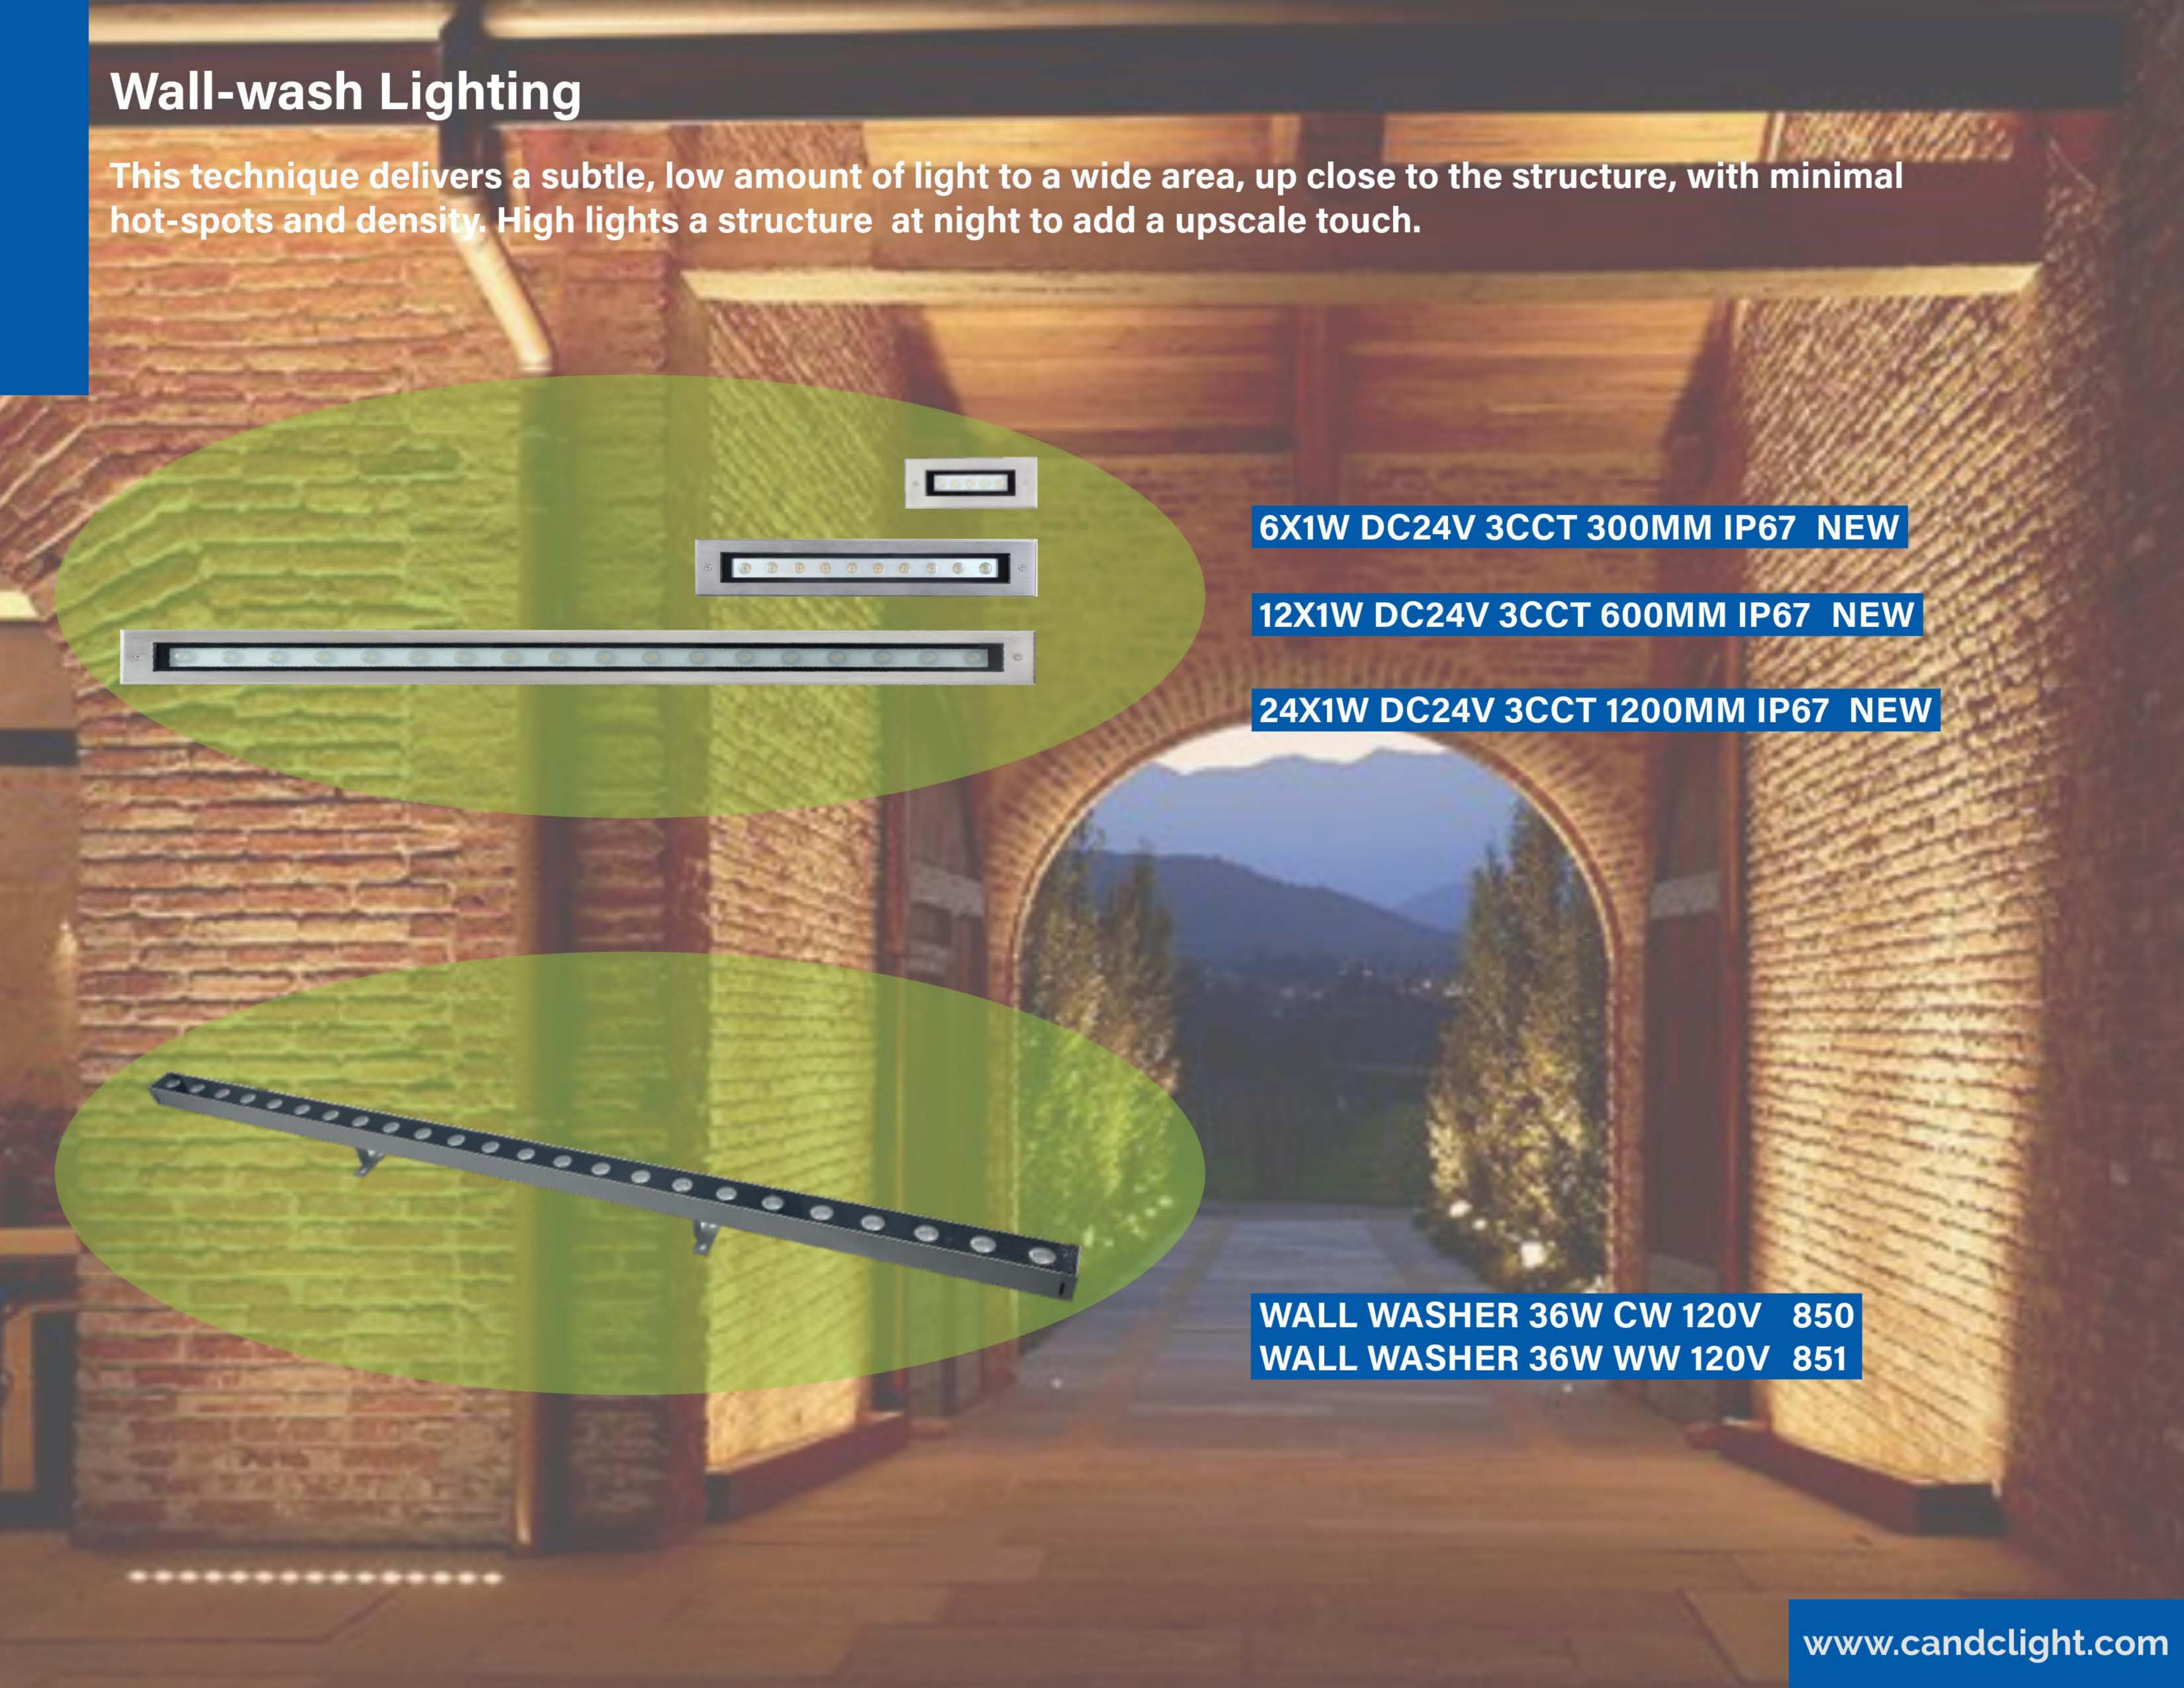

Uplighting trees is an art form that the landscape lighting contractor learns with time. Further, no two trees are the same, and how the tree is situated within the landscape design will affect how you illuminate it. Still, there are some basic rules that are helpful to refer to when you are lighting any tree in a landscape.

Downlighting makes a space inviting and delightful for social gatherings. It creates a special experience without the lighting itself being obvious. Downlighting can be installed on structures, such as pergolas or gazebæs₁₀₄₋₀₅

With a tall tree, downlighting can simulate the impression of moonlight and, with a gentle breeze, you will be able to see the shadows of branches and leaves at play on the ground.

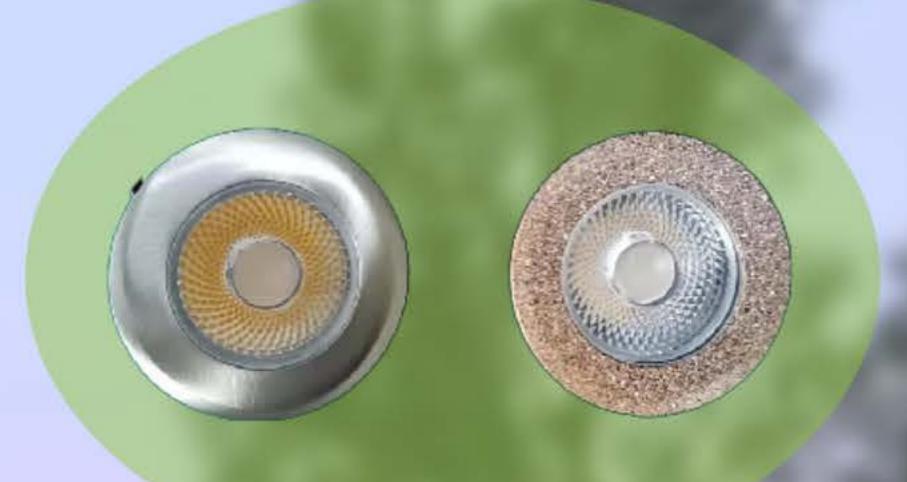

In-ground Lighting

Deliver light to permanent and semi-permanent installations such as sidewalks, large mature trees, walls and flagpoles.

The location is in turf, where an accent fixture above ground would be a tripping hazard or vulnerable to damage from lawn mowers and weed trimmers.

The location is along a driveway or other concrete structure and accent lights would be too visible or in the way. The location is around a well-traveled path, where foot traffic might damage an accent light or cause someone to trip. The customer prefers the look of in-ground lighting. They simply do not want to see an accent light sticking up.

Path & Spread Lighting

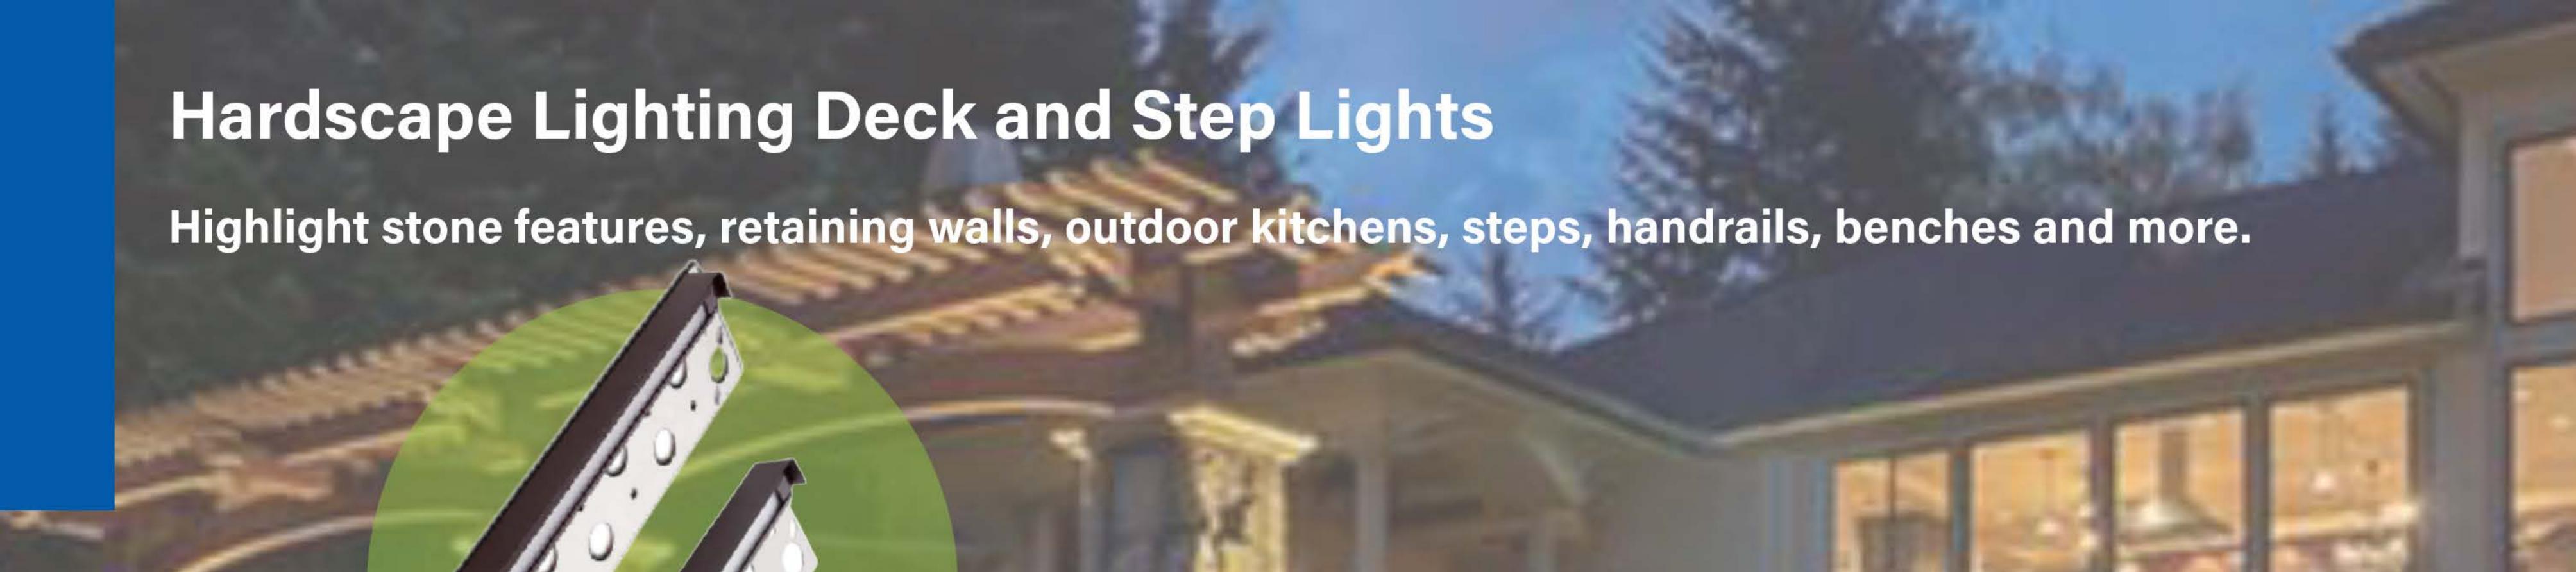

Illuminate sidewalks, stone pathways and lawn walkways while adding a hint of intrigue to boulders and plant beds. Spread lighting uses a path light inside a landscape bed to illuminate the plantings.

Bollard Lights

Our line of LED bollard lights are offered in many different styles to complement the pedestrian walkways surrounding various types of buildings, businesses, parks, or educational facilities. Our bollards help illuminate pedestrian pathways while providing a polished, aesthetically pleasing design to fit the style and look of any commercial or public property. Choose from our wide range of styles such as flat top, round top, and beveled tops. Different models have louvers or cover plates for directional light control. We offer models in both black and bronze finishes. They are built to last with watertight construction and low-energy consumption LEDs that require no maintenance. You can either retrofit existing concrete applications or shop our mounting options for new installations.

wall sconces

With your front porch or doorway area, you have a chance to welcome guests to your home before they even set foot in the door. A large, outdoor wall-mounted fixture next to your door will say 'welcome' even better than your clever welcome mat. And a ceiling light and pendant will put polish on a front porch.

LED Post Top Area Light

LED Post Top Area Light is designed replace existing garden street light, yard light etc. There is 130lm/w high brightness. Photocell and dimmable fuction to save more energy. Durable chip and fade resistant powder coat finish are perfect for outdoor application. Clear transparent glass. Dual 10KV surge protection make sure the lamp work well in strict outdoor application. ETL/DLC listed with 5 years warranty.
