

Aluminum linear lighting profile

C&C lighting AL profiles are customizable LED linear light housings. Providing new ways of incorporating lighting into interior and exterior spaces opens the doors to vast design and creative opportunities. Aluminium also acts as the heat sink to extend the life span of your LED light.

AVILABEL FINISHES

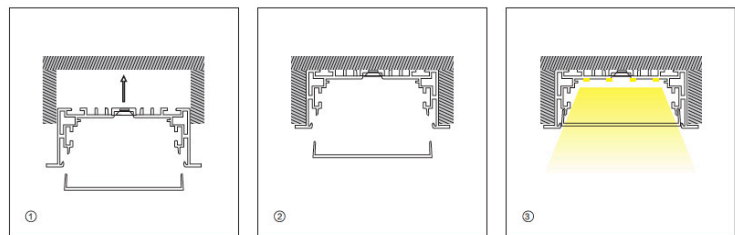

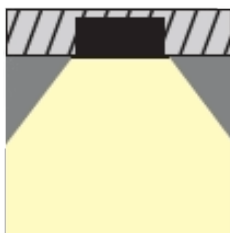

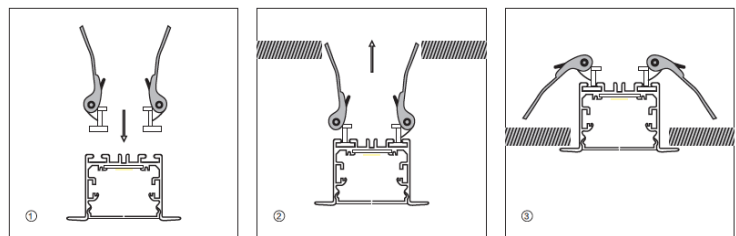

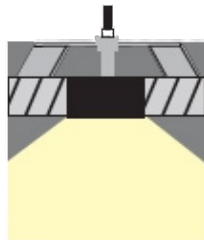

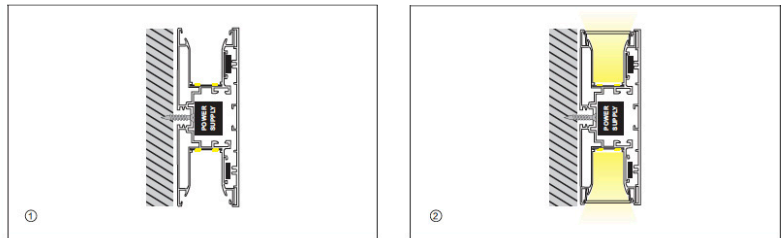

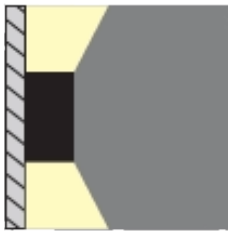

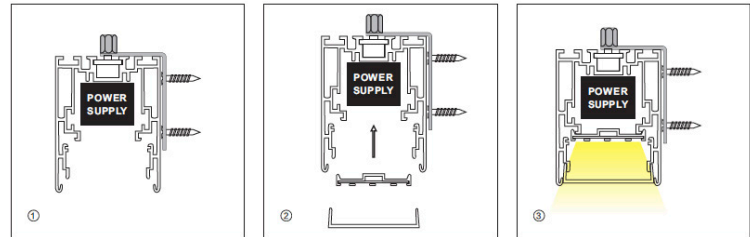

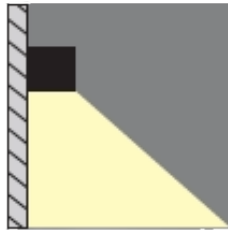

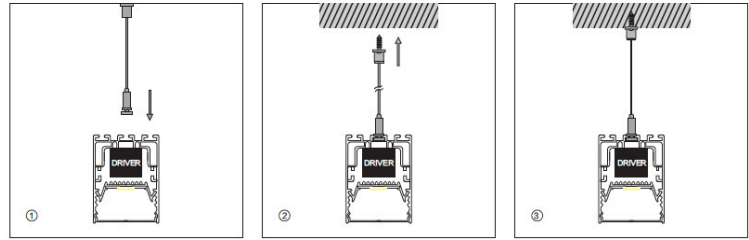

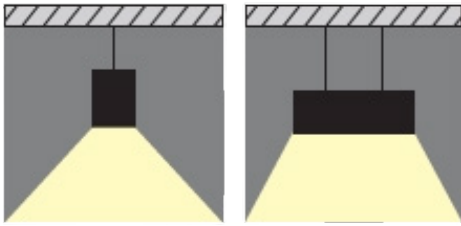

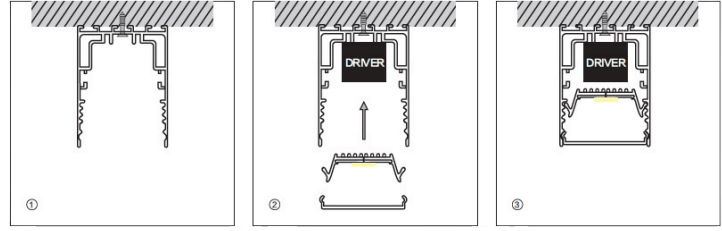

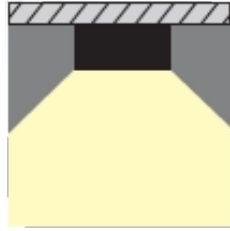

Our aluminum profile is an LED lighting housing, allowing new architectural and interior design. Adding new sensitivity to interior and exterior spaces with immersive and indirect lighting, further breaking the boundaries of function and form. That means it further demands the collaboration of design, construction, electrical and lighting professionals. This product is highly customizable for the personalized effect.

Related products that provide as a package to make the installation easy:

- Aluminum profile
- light source
- power supply and control
- installation hardware and accessory
