

Frames Tutorial by Melanie Smith

After coloring the stamped image, I used the smaller oval die from the Woodland Foliage set. It fit perfectly! I then took a folded card base and using the larger die I positioned it carefully over the fold so that that portion of the fold would not be cut. This gave me a perfectly die cut oval card.

For the blue layer which framed the colored image... Using the smaller oval die I traced the outer perimeter of the die onto the blue paper and cut on the traced line.

This allowed me to frame the main image in blue.
