

Lock-Itz Cupcake Tower Card Tutorial

L·D·R·S *creative*

Step 1. For A2 size card, use a paper that measures 12" w x 5.5" h and place dies cut side down on the side you want to show on the front at 1.75" inward from both ends with the design facing outward to the edge of the paper like above.

Step 2. Run the die through your favorite die machine and it will cut the design.

Step 3. Did I mention how beautifully these dies cut? Woo Hoo! Almost done.

Step 4. In order to make the cut design POP, cut a few pieces of your favorite DP. Here I used a pretty sheet from the Splendid Azure 6 x 6 pad from the TLC Inspired Crafting line.

Step 5. Turn the card over and meet the edges of the paper in the center (or off to either side), gently push the paper down and score where the fold occurs on each side of the card. Once you've scored the edges, just pull upward on one side and slide the design together with the other side. It will look like the above.
